## LUM LINERS IN DANGER SAFEGUARD ON HEALTH

### Confiscation Is Threatened Examination Is Urged Annually

**New Head of Medical Body  
Says Present Plan is to  
Prevent Disease**

**Liquor Limit Attacked in  
Resolutions; Radium  
Cures Discussed**

**BY A. P. NIGHT WIRE**  
SAN FRANCISCO, June 25.—Physical examination of every citizen of the United States at least once a year was advocated by President-elect Ray Lyman Wilbur, in his opening address at the seventy-fourth annual convention of the American Medical Association which began here today.

Modern medicine is concentrating on preventive, rather than curative measures, declared Dr. Wilbur, who is head of Stanford University of California and who is the first Far Westerner to be offered the presidency of the American Association.

"The attitude," he said, "used to be 'don't go to the doctor until you're sick and have a temperature of 105 deg.' but now the aim of medicine is to protect the normal man from diseases which might attack him. 'Am I sick?' has given way to 'perhaps I'm not well.'

#### DEPLORED CHIROPRACTICS

Another address before the association's house of delegates, the principal gathering today of the thousands of medical delegates here for the convention, was that of Dr. F. C. Wunschel of Grand Rapids, Mich., speaker of the house, who deplored what he termed the rise of antiscientific cults, notably the chiropractic.

The past year has witnessed attack after attack upon the integrity of the profession, particularly by the medical lobbies.

"The attitude," he said, "unless we concern ourselves with political affairs we might as well openly announce that we are interested only in scientific features of our profession and withdraw from public participation in matters of public concern and public consideration."

Most of the 800 physicians present the first day at diagnostic clinics here and in Oakland across San Francisco Bay. Thousands of patients visited Exposition Auditorium to see the scientific and commercial exhibits which occupy the entire first floor.

One of the scores of exhibits which opened this afternoon showed that China has one physician for every 25,000 population.

If the same ratio obtained in this country, there would be exactly 393 physicians.

New York's quota would be 21 doctors;

Chicago's about dozen; St. Louis would have two physicians,

San Francisco and Los Angeles one a piece.

Other scientific exhibits demonstrated through photographs and charts the effects of glands upon physical development.

## Law Enforcement Demanded by President in Address at Denver

### HARDING DECLARES ISSUE PARAMOUNT IN COUNTRY

**States Said to Have Nullified All Rights by Dry Law Repealers; New Plea for World Court**

(BY A. P. NIGHT WIRE)

mind an attitude of willing acceptance and obedience to law, is the most impressive mark of a civilized community.

DENVER, June 25.—President Harding today noon delivered an address here on the subject of law enforcement. Following is the complete text: My countrymen: It has been said that "Of the making of books there is no end." Quite as truthfully it might be paraphrased, "Of the making of laws there is no end." We Americans undoubtedly hold all records for the making of a multiplicity of laws, State and national. If we were as assiduous about obeying and enforcing obedience to them as we are in demanding and enacting them, there would be no particular occasion for me to address you today on the general subject of law enforcement. We all recognize that to secure laws, to establish in the public without a parallel. Thus viewed, I think we will find all justification and satisfaction in our program thus far and confidence in an assured future.

Laws, of course, represent restrictions upon individual liberty, and in these very restrictions make liberty more secure. The individual's sense of security is his privilege to do as he pleases for the common good, and so organized society is possible. It is successful just about in proportion as it is successful in its deliberate and intelligent public opinion, and as they are obeyed. Civilization had to travel a long way before it came to be commonly accepted that even an amendment to the Constitution in orderly fashion, because such enforcement would insure its repeal or modification, also in orderly fashion if that were found desirable.

#### PROTESTS CRITICISM

At this point it is worth while to raise a voice in protest against the vast volume of half-baked criticism of the new law which others have been pleased to offer. The States and the nation: the idea of concurrent authority and concurrent responsibility. That is so elemental that it is difficult to say that to do away with it would amount to disbanding our whole system of government.

Certain functions and responsibilities have been imposed upon the national government, while others have been reserved to the States. Between these two authorities there will always be unavoidable something like a twilight zone. Personally, I have never liked that situation, but I have resolved it in a particularly unfortunate and misleading description. The intermediate zone which receives light from two sovereign luminaries ought to be the best, not the worst, guarantee of law and order. It can be made exact that if we will realize the necessity for real co-operation between national and State authority, if we will only develop effective means for the exertion of rapidly changing conditions. It is the very impression of many that our liberty is a license, instead of guaranteed freedom under the law.

Older countries have had the problem of developing their institutions slowly, gradually painstakingly, through multiplied centuries. In which change was commonly extremely slow. America had to build on the foundation of the English common law, which was not always adaptable to our requirements and therefore necessitating many experiments in modification and readaptation. Moreover, we started our experiments at the time when the old medieval order was being changed by the processes of the industrial and social revolution which originated from the lower Middle Ages into the modern era of modern industrialism, modern science and modern democratic procedures in government.

#### PROGRESS JUSTIFIED

The founders of our country were compelled to establish institutions here in a time when the whole inheritance of intellectual, moral and political traditions was being wrenches by the most amazing revolution that human history has known. Under the circumstances, their achievement in laying the foundation, and our later one in building our present superstructure upon it, represents an accomplishment, I believe

Scott Bros.  
2  
Pants  
Suits  
Specialists

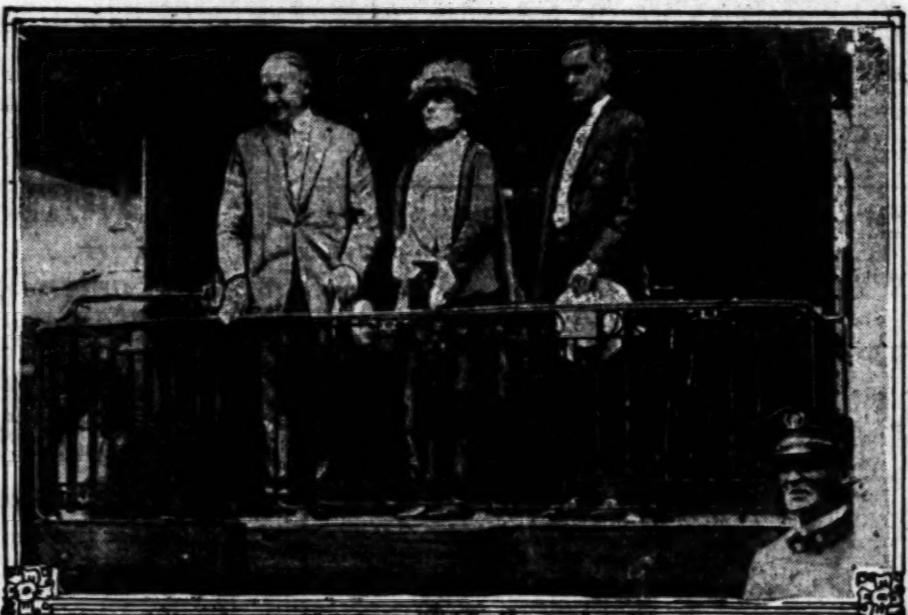

We get used to everything no matter how wonderful. The phonograph the telephone the "wireless" the X-ray have all lost their thrill. It's a way we have of taking things for granted. Nobody now wonders how marvelous it is that one can come into our shop, and no matter what his SHAPE or SIZE, be fitted out in half an hour with one of our handsome 2-4 ANTS suits. Yet 2-PANTS suits are a wonderful "contraption" when you consider how superior they are to one-pants suits. You always have the Extra pair pressed and ready to put on. And the Extra pair gives double wear.

#### BASIC LAW

We have dealt upon the same general principle in fixing a program for the utilization of the waters of the Colorado River. Indeed, I have thought these conferences concerning the germ of an idea which may some day grow into a useful auxiliary to our constitutional system; a formal council of co-ordination, representing State and national governments; authority to examine into particular needs in this area, to advise projects in co-ordinated action, and to propose them formally to the Congress and the legislatures. Very possibly the powers of legislation or of mandatory regulation, such a body might render an advisory service which, if made permanent and continuing, would be of great advantage.

For the present there are immediate problems, such as which cannot await the possible creation of any such slow-moving mechanism of philosophic consideration. The prohibition amendment, the Constitution is the basic law of the land. The Volstead Act has been passed, providing a code of enforcement. I am convinced that they are a small and a greatly mistaken minority who believe that the Eighteenth Amendment will ever be repealed. Details of enforcement policy doubtless will be changed as experience dictates. Further, I am convinced that whatever changes may be made will express the sincere purpose of effective enforcement, rather than moderation of the general policy. That means simply an invitation to the Federal government to exercise powers which should be exercised by the

#### LAST RITES FOR CURTIS

**Victims of Denver Accident Mourned by Hardings**

**Wife of Correspondent to Meet Body in Chicago**

**Donald Craig Expected to Survive Injuries**

(BY A. P. NIGHT WIRE)

DENVER (Colo.) June 25.—Funeral services for Sumner Curtis, representative of the Republican National Committee on President Harding's trip to Alaska, took place this afternoon at a local mortuary. Curtis, Thomas F. Walsh, formerly widely known Washington newspaper man, and Thomas French, Denver, lost their lives as a result of an accident yesterday on the Bear Creek Canyon road when the automobile in which they were riding plunged over a seventy-five-foot embankment.

Through injuries suffered in the collision of David Clegg, Washington correspondent of the New York Herald, was declared hopeful tonight, as an X-ray today failed to show any fractures. No indication of internal injuries have developed.

John F. Vivian, National Republican Committeeman from Colorado, left for Chicago late today with the body of Mr. Curtis. In Chicago, he will meet with the Chicago newspapers with a delegation from Washington, will meet the body, and with them will be Mrs. Curtis, the widow. Mr. Curtis' son, Max, will be accompanied by his mother.

John E. Hayes, National Republican Committeeman from Colorado, left for Chicago early this morning with the body of Mr. French.

The funeral services will be held at 10 a.m. Saturday morning at the First Church of Christ Scientist, of which Mr. Dawson was a member.

Solemn high mass will be said for Mr. French Wednesday morning at St. Peter's Church in Loyola Chapel.

The Knights of Columbus and representatives of the Denver Press Club and the Washington correspondents with the Presidential party will be present. Mr. Hayes' personal party attended the services today and accompanied the body to the train.

Mr. Dawson's funeral will be held Wednesday afternoon at 1 p.m. from the First Church of Christ Scientist, of which Mr. Dawson was a member.

Solemn high mass will be said for Mr. French Wednesday morning at St. Peter's Church in Loyola Chapel.

The Knights of Columbus and

representatives of the Denver Press Club and the Washington correspondents with the Presidential party will be present. Mr. Hayes' personal party attended the services today and accompanied the body to the train.

Mr. Dawson's funeral will be held Wednesday afternoon at 1 p.m. from the First Church of Christ Scientist, of which Mr. Dawson was a member.

Solemn high mass will be said for Mr. French Wednesday morning at St. Peter's Church in Loyola Chapel.

The Knights of Columbus and

## EXPLORER WILL RADIO WEEKLY NEWS OF ARCTIC

**Times** to Present Special Service  
From Bowdoin as It Cuts  
Through Ice Packs

The Los Angeles Times today presents the full technical details of the system under which Dr. Donald B. MacMillan, noted explorer, will send weekly stories from the Arctic, special correspondent of this paper, during his fifteen-month stay on the schooner Bowdoin, now sailing north from the many special problems involved.

The plan of communication was worked out by the officials of the American Radio Relay League in the face of peculiar difficulties.

### RELAY MESSAGES

In brief, the plan is that the Bowdoin's messages will be sent out at stated intervals, being repeated if the Bowdoin receives no acknowledgment. The Bowdoin will forward Dr. MacMillan's written story, covering the week's developments to the first amateur who gets in touch with the Bowdoin at that specific occasion. This amateur, having completed the taking of the messages from the Arctic, will immediately broadcast them to the nearest newspaper which is a member of the North American Newspaper Alliance. In this territory, the paper is The Los Angeles Times.

No newspaper in this territory will have the privilege of printing any news from the MacMillan expedition. Dr. MacMillan is the special radio correspondent of The Times in the Arctic throughout the voyage, whether it lasts for the expected fifteen months or is continued for years as the result of unforeseen circumstances.

### SPECIFIC INSTRUCTIONS FOR AMATEUR FANS

Here is the complete set of instructions for radio amateurs who

will aid in enabling the Los Angeles Times to print, from week to week, the progressive story of the voyage of Dr. Donald B. MacMillan in the Arctic. The instruction that "there is told of the need of constant watchfulness in order that any urgent message sent by Dr. MacMillan—equivalent to a SOS—cannot be lost in the air without acknowledgment."

Paste these instructions up beside your radio set. The MacMillan party plans to be gone fifteen months; it may be held in the Arctic for much longer period.

### WELL-LAID PLANS

If any modification or revision of these instructions is found necessary, the changes will be published in the Los Angeles Times and notice of them will also be issued through radio channels.

These plans were worked out by officials of the American Radio Relay League, including Hiram Percy Maxim, president; H. Schnell, the league's traffic manager, and Kenneth B. Warner, secretary, in conjunction with Dr. MacMillan and the North American Newspaper Alliance.

The members of the North American Newspaper Alliance, including the Los Angeles Times, will publish the MacMillan relayed stories, the explorers' schooner, the Bowdoin, and copied by the amateurs.

### GIVE INSTRUCTIONS

Eastern Standard Time—10 p.m. to midnight; WNP will QRX for press reports.

Midnight; WNP will QRX for reports via NSS (17,000 meters).

1 a.m. to 2:59 a.m.: WNP will communicate with amateurs.

2 a.m. to 4:59 a.m.: "WNP will work a special schedule.

5 a.m. to 7 a.m.: WNP will communicate with amateurs.

WNP will QRX on about 17,000 meters for special work with limited commercial stations.

Dr. MacMillan will permit Mix to operate every night, but due consideration must be given the period of operating hours of the transmitter because of the limited amount of fuel which is carried to operate the Dolcini outfit. At other times it may be necessary for Mix to "turn to and lend a hand" in rigging the ship. However, WNP can be expected to be listening for most of the night.

These things which must be taken into account with the foregoing schedule. It may seem rather late for starting yet we must give the following on the west coast the same chance as is given those on the east coast.

### MESSAGES AND DELIVERY

Dr. MacMillan has agreed to send a weekly story to the North American Newspaper Alliance, with main office at room 22, 12 Park Row, New York City, whenever communication is possible. The A.R.R.L. has agreed to do its utmost in endeavoring to copy these messages and deliver them to the N.A.N.A. Each story will be sent code or in plain type as determined by Dr. MacMillan, on Monday morning, at 1 o'clock, the scheduled hour for starting.

In return for what we are going to do, Dr. MacMillan will permit Mix to communicate with us amateur operators on the air during the hours during the entire trip. Each week WNP will send the list of calls heard to A. R. R. L. headquarters.

Our method of handling Dr. MacMillan's messages addressed to the N. A. N. A. will be as follows: Each week, on Monday, or as soon thereafter as communication is possible, WNP will come down to amateur wave lengths and put you in touch with any available amateur. If he is successful he will give his story to whatever amateur he happens to work.

### ACKNOWLEDGE MESSAGES

That amateur will QSL (acknowledge) the message in the usual manner. Failing to raise any amateur during the scheduled period, WNP will then broadcast the message and it is up to us to get it. You see, it may be perfectly easy to copy. We hope the hope of lowered prices buying is postponed and that very postponement is contributive to a decided price increase. There is need for some individual initiative and responsibility in preparing the market for the economic blunders in operating mines half and quarter time, by which the higher labor costs are made necessary.

"Meanwhile, we shall the better guard our interests and stand by in hardship if the consuming public will help as best it can, without expecting the government to assume responsibility.

"If the coal consuming world would buy coal during the periods of scant consumption, it would guard itself against price panics and dangerous shortages when the seasons of peak demand come. The hope of lowered prices buying is postponed and that very postponement is contributive to a decided price increase. There is need for some individual initiative and responsibility in preparing the market for the economic blunders in operating mines half and quarter time, by which the higher labor costs are made necessary.

"Now, what do when you get a message from WNP, either by direct communication or by broadcast? There is included a list of newspapers affiliated with the N. A. N. A. They have been instructed in regard to handling Dr. MacMillan's messages. The first thing you are to do is when you receive a message to make a legible copy of it and mail it immediately to the nearest newspaper. This story is to be given only to newspapers on the list—not others.

### MAIL TO TIMES

The proper address is: North American Newspaper Alliance, care of The Los Angeles Times.

Just as soon as you have done this, mail it to your newspaper. If you copied it as it was being sent to another station, or whether it was sent as a broadcast message. These things are important. All amateurs are requested to report daily to WNP. Your daily consistency record may be kept. A monthly report of the successful stations will appear in QST each month.

As a precaution is being taken before the Bowdoin sails, a special class of messages has been provided for bearing the prefix urgent. This prefix will be used in emergencies or unusual circumstances. While it may arise, we must be on the lookout for it. Instructions for delivery of urgent messages should be observed carefully. If by any chance you should receive or copy a message bearing the prefix urgent, the very first thing for you to do is to telephone or telegraph immediately to the newspaper affiliated with the N. A. N. A., informing its office that you have received an urgent message from Dr. MacMillan. The text of such a telegram may be as follows: "Have received urgent message from Dr. MacMillan. Advise disposition immediately." The newspaper will then acknowledge receipt of your wire and will advise you just where and how delivery of the message shall be made.

It is very important that you keep an accurate log of everything in connection with hearing messages from WNP. Do everything you can to expedite communication and delivery of messages falling into your hands.

### SUGAR QUESTION

"I have not come to talk politics to you, but as you know, there has been considerable discussion

## "TIMES" INFORMATION AND RESORT BUREAU

New Night Service Now in Effect  
Questions Answered Up to 11 P.M.  
Every Night Except Sunday

Strangers and newcomers, children and old folks, need never worry if they arrive in Los Angeles after regular business hours. If they wish to know how to reach any street, suburb or surrounding town, how to get to depots, bus lines, theaters, hospitals, schools, hotels or resorts, all they need do is step in any telephone booth and call up the Times Information and Resort Bureau.

It will be a pleasure to furnish such information, and every effort will be made to make directions simple, clear and understandable.

Tell your family and friends, about this new night service, always ready and cheerfully performed, every night except Sunday until 11 p.m.

Telephones: Metropolitan 0700 or "10391"

## HARDING GIVES CROWDS HOPE

(Continued from First Page)

the situation, or deaf to appeals. It is doing everything possible, so far as authorized by law, to dispel public apprehension over the authority of the act of Congress.

The United States Coal Commission, made up of able and earnest men, has been engaged in a thorough investigation of this situation and will report to the Congress next December. It is going thoroughly into the labor controversy, studying living conditions and the community life in the mining regions, examining complaints about inadequacies which prevent prompt distribution, inquiring into engineering problems and the economic errors incident to overdevelopment, looking to the mines in profit, reflected in inordinate charges for coal, and preparing an exhaustive report on the entire industry.

"It will be revealing and we hope revealing to us. We shall know the facts about a country which is the source of peril to the nation's industrial life, and a more or less continuous threat to our domestic comfort, sometimes a menace to life and health.

REPORT WILL BENEFIT

Dr. MacMillan has agreed to send a weekly story to the North American Newspaper Alliance, with main office at room 22, 12 Park Row, New York City, whenever communication is possible.

The A.R.R.L. has agreed to do its utmost in endeavoring to copy these messages and deliver them to the N. A. N. A. Each story will be sent code or in plain type as determined by Dr. MacMillan, on Monday morning, at 1 o'clock, the scheduled hour for starting.

In return for what we are going to do, Dr. MacMillan will permit Mix to communicate with us amateurs on the air during the hours during the entire trip.

Each week WNP will send the list of calls heard to A. R. R. L. headquarters.

Our method of handling Dr. MacMillan's messages addressed to the N. A. N. A. will be as follows:

Each week, on Monday, or as soon thereafter as communication is possible, WNP will come down to amateur wave lengths and put you in touch with any available amateur.

If he is successful he will give his story to whatever amateur he happens to work.

DEMARI AND MARTIN AT SAN FERNANDO

THEIR INDIVIDUAL BOWLING

## Pat Moran's Lads Regarded as Contenders

### MUGGSY RATES CINCINNATI HIGH

Says Red Legs Are One of Three Contenders

Best Fielding Gardeners in Game Today

Team Seems to be Lacking in Real Punch

By JOHN J. McGRAW,  
Manager World's Champion Giants  
(EXCLUSIVE DISPATCH)

NEW YORK, June 25.—In attempting to analyze the several teams the Giants have had to fight on this western tour I have frequently done so by answering questions put to me by plain, ordinary fans. After all they are the backbone of baseball. Their queries are the most direct and pertinent.

After traveling this circuit for more than a quarter of a century, I have seen many teams and a few old friends who always come around to say "howdy." These old pals mince no words in getting down to the point. To be honest with them I must be frank.

#### OLD ROOTERS

As in other cities a few old fans have called on me. While in Cincinnati three of them had dinner with me the first night. They are inveterate rooters for the Reds and the Indians, particularly the Indians. I will repeat their questions and my answers as my analysis of the Cincinnati Reds.

"Tell us, Mc," was the first question, "have we—the Reds—really got a chance?"

"You certainly have. Right now I regard Cincinnati as one of the real contenders," I told them. "What's more I think it the greatest thing that could happen to baseball—to have the Reds up there in the fight. The first real baseball club was here and the fans have been coming to the games ever since in hope of repeating. This is one of the real nests of baseball. The game is founded on the enthusiasm of cities like Cincinnati and Pittsburgh."

"How does our infield rate—Doubt, Bohne, Caveney and Pihell?"

#### RATE AS THIRD

"I rate the Reds' infield as third in the National League. Only the Giants and the Pirates surpass it. Give the infield another year of seasoning and it will be hard for anybody to pass it. It is not what I would call a combination of great stars but it hustles. Pinelli, Caveney and Bohne have come with a lot of heart and on their toes every minute. To back them up and steady the infield machine they have the veterans Jake Dauber, one of the greatest hitters of baseball. There is one man entitled to all the praise he gets right here. Dauber is a credit to all baseball."

"How about the outfield, Mac?"

"Burns, Roush and Duncan make up the best fielding outfit in all baseball. In that particular I know of no outfield that can compare with it."

#### LACKS PUNCH

"If the Reds had just a little more punch, driving power, it would be the most dangerous contender. It has the spirit and the ambition. Pat Moran and his bunch are smart ballplayers. They never seem to know what they are in there for. Only a manager can really appreciate what that means."

"How does the pitching staff rate?"

#### GOOD STAFF

"As good as any. Donohue, Luque, Darnley, Bresler, etc., were toward making the Reds a star ball club. In our opening game Donohue showed what a smart pitcher he was by the way he got out of the hole."

"How do you account for the fact that Luque strikes out more batters this year than ever before and still allows about the same number of hits?"

"That," I told him, "is tribute to the Giants having tried to trade him last winter. Since he heard about it he has made him a better pitcher. All he needs now is to develop that punch, the one little thing the team seems to lack."

"Is our reserve strength really as good as the experts say?"

"It's the strength of the Reds," I told him. "is one of the best in baseball. Fonseca, Bresler, Harper, Kimmick and Sandberg are smart ballplayers. They never seem to know what they are in there for. Only a manager can really appreciate what that means."

"How does the pitching staff rate?"

"As good as any. Donohue, Luque, Darnley, Bresler, etc., were toward making the Reds a star ball club. In our opening game Donohue showed what a smart pitcher he was by the way he got out of the hole."

"How do you account for the fact that Luque strikes out more batters this year than ever before and still allows about the same number of hits?"

"That," I told him, "is tribute to the Giants having tried to trade him last winter. Since he heard about it he has made him a better pitcher. All he needs now is to develop that punch, the one little thing the team seems to lack."

### ENERGIZING ENTIRE BODY

*Building Up Nervous System Will Improve Physique and Preserve Health, Says Severns*

Article XLIII

BY BARCLAY L. SEVERNS

When the nervous system is properly balanced it has the necessary energy and it is impossible for the body to become old, but this balance can neither be secured nor maintained without proper exercise, hints to localize his strength in that part of his body where they most needed. He drives by sheer force of mind his powers of resistance to that part of his body where he wants it.

When you awaken the consciousness of the muscles, you will derive more physiological benefit from five minutes' exercise than you could obtain from an hour's work in the ordinary kind. The mind, nerves and muscles must be made to co-ordinate.

#### MORNING EXERCISES BEST

If possible, take your exercises the first thing in the morning and just after retiring at night, rest for ten seconds should be taken after each one. At first you will find yourself holding your breath. You must not do this, but breathe freely and easily. This may be a little difficult. This is as it is the natural way to breathe. It is a good idea to inhale during the upward movement and exhale when returning to original position.

You have to possess a strong constitution to gain a great deal of benefit from the various physical exercise dumb-bell and bar exercises, which do not bring the mind into play. The real fact is that it is neither food nor the form of exercise that makes the body strong, but it is the mind that develops the muscles. It is mental strength, mental energy and control of the mind that make a man strong, not the mere outward physical exercise.

In the morning take the exercises only one-half as many times as at night. It will not be necessary to stop with the exercises except when you are very tired. You will find that these exercises improve the circulation of the blood and a normal functioning of all the glands of the body.

The purpose of the evening exercises is different from that taken in the morning.

#### PROMOTES ACTIVITY

These exercises cause a great deal more oxygen to be taken and consumed by the body. The heart becomes more active in order to supply the tissues with extra oxygen. Breathing is done through the nose, open, as you draw within as much oxygen from the air as possible.

You also breathe through the nose, as in this way you fill your lungs full of fresh air.

This advice concerning breathing with the mouth open, only applies to periods when you are taking the exercises. Otherwise, you should draw air through the nose, always drawing to fill the lungs full of fresh air obtainable.

"It," however, you breathe only through the nose while taking the exercises, you cannot touch straws upon the heart and nervous system.

The object of these exercises is to increase the elimination of waste matter in the tissues. If this waste matter is not removed quickly it is likely to cause the tissue to become sore. If you have not been in the habit of using your muscles freely to eliminate waste products learn to do so and lameness will disappear, as well as other ailments.

Wallace Johnson is his usual reliable self. His unexpected defeat by Watson Washburn in the Church Cup means nothing, as Washburn was at his very best, and when so may defeat anyone. Johnson lost to me in four sets in the Philadelphia district, after beating Carl Fischer in the semifinals.

Watson Washburn in his few appearances this year impresses me as having regained his 1921 form. His win from Johnson was most impressive.

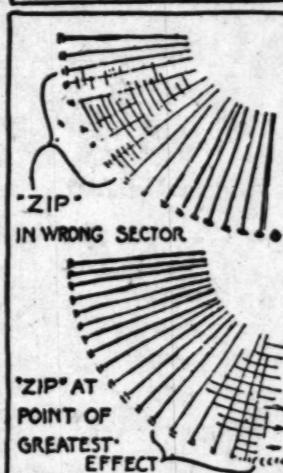

Francis T. Hunter, with the Florida State title to his list and victory over Bill Williams II in the Church Cup, has had the season most auspiciously. Vincent Richards has been Francis Hunter's only stumbling block this year. He is now abroad with Richards, and should return more dangerous than ever.

The Californians, the Kinney brothers, Howard and Bob; Willis Davis, Harvey Snodgrass, etc., have not yet arrived East, so I have no idea of how they are playing.

Howard, Vosh, Harold Throckmorton, Jose Alonso, Fred T. Anderson, Carl Fischer, Arnold Jones, Herbert Bowman, Nat Niles, Lawrence Price, Stanley Peterson, Hugh Keeler, Dan Mathey and the host of other stars all seem to me to be in their regular form. Thus far it seems a Richards and Hunter year.

### LITTLE LESSONS IN Big Sports

At what angle of the downward stroke of the drive should the "zip"—the wrist movement—start?

Answered by

JIM BARNES

American open champion, 1921; recognized everywhere as one of the greatest golfers in the world. In British open championship 1922, he finished second, one stroke behind Walter Hagen, the winner.

The wrist action should be delayed as long as possible because it is used early in the swing, its force is played out when the time comes for the club head to hit the ball. Don't actually start "striking the ball" until the club head is about two feet from the ball. Then is the time for the wrist movement. During the downward swing, before the "zip" is used, the wrists should be free and not rigid.

YOUNG TERRY WILL BATTLE AT HARBOR

Billy Darnley of Anaheim signed Young Terry and Jack Sparke to fight next Thursday night at San Pedro in the main event. Terry is Darnley's best fighter and is expected to put up a good fight. At present Young-Terry is trying through Darnley to get a match with Terry Adams, who he claims can knock for a row of ash cans.

How do you account for the fact that Luque strikes out more batters this year than ever before and still allows about the same number of hits?"

"That," I told him, "is tribute to the Giants having tried to trade him last winter. Since he heard about it he has made him a better pitcher. All he needs now is to develop that punch, the one little thing the team seems to lack."

**FAVORS JOINT RAIL SCHEDULE****Milwaukee Road Wins Big Point in Finding****Union Pacific Unreasonable, Examiner Says****Commerce Commission is to Pass on Case**

**EXCLUSIVE DISPATCH**  
WASHINGTON, June 25.—In a case of importance, because of the prospective increase in the density of transcontinental traffic to the West Coast and the greater revenue returns, the Chicago, Milwaukee and St. Paul Railroad wins another victory over the Union Pacific Railroad in the fight of the former for longer hauls on traffic to Portland, Or., if the Interstate Commerce Commission approves a tentative report submitted to it today by Examiner Kepner.

The examiner has recommended a finding that the refusal of the Union Pacific and its subsidiaries to enter into through-rate and joint-rate arrangements with the Chicago, Milwaukee and St. Paul, Wash. on traffic originating on the Milwaukee-Chicago-Omaha line, branches to the South, and certain connections, which destined to Portland, is unreasonable. The examiner maintained that it is also contrary to the public interest because it deprives the Milwaukee of the long haul.

Approval of the report by the commission would mean an order requiring the Union Pacific to make available its resources and joint-rate arrangements by way of Plummer or Marengo, and in the event it had, whether the public interest, or any other consideration, required it, to require the ordering of such an arrangement. The question of rate invasions was not dealt with. On the two primary points raised, the Union Pacific strongly opposed the position of the Milwaukee.

**Consider Plans to Police China Railroad Lines**

**BY CABLE—EXCLUSIVE DISPATCH**  
PEKING (China) June 25.—The Foreign Diplomatic Corps is meeting today to consider the British suggestion to organize a foreign emerced gendarmerie to police China's principal railroad lines.

Following the publication of a telegram telling that the plan had been discussed in the House of Commons in London, the American Legation here admitted that the matter had been submitted to Washington by the British Foreign Office.

Chinese political leaders here declare the scheme is impractical to be carried out, and that the proposed "railroad army" will have in harmonizing with the independent armies maintained in various provinces.

**CANADA INCREASES EXPORTS OF FLOUR**

**FOREIGN TRADE OF DOMINION GOING AHEAD FASTER THAN HERE**

**EXCLUSIVE DISPATCH**  
WASHINGTON, June 25.—Canada's four exports have increased 107 per cent compared with the prewar average while those of the United States have increased only 47 per cent, according to a summary made public by the Department of Commerce today in connection with its investigation of world trade in agricultural products.

It is declared that while Canada is exporting to be better customized products as much flour as the United States, she is at the same time expanding into other territory. Before the war the United States exported two and one-fourth times more flour than Canada, the amounts being 10,675,000 and 3,820,000 barrels respectively. During the period of the war Canada increased her average yearly total exports to 17,000,000 barrels while the amount coming from the United States reached 14,350,000 barrels. During the last year, ending March 31, 1923, the average Canadian exports of flour have been 7,855,000 barrels while those of the United States have been 15,070,000 barrels.

Canada since 1921 has increased her prewar flour exports to the United Kingdom 72 per cent while the United States has increased her prewar flour exports to the United Kingdom by only 2 per cent.

**BALL PLAYER KILLED BY LIGHTNING BOLT**

**EXCLUSIVE DISPATCH**  
MONROVIA (Ill.) June 25.—Roy Mears, second baseman for the Strenghurst ball team, was killed by a bolt of lightning and three others were knocked unconscious during the fifth inning of the Strenghurst-McComb game at Strenghurst, Ill. The lightning pierced Mears' body. Oscar Croston, the McComb runner, of section, and Jimmie Thompson, Hartquist and Pitcher Oscar Dillon of Strenghurst, were the injured.

**PLACARD VILLIFYING HARDING TORN DOWN**

**EXCLUSIVE DISPATCH**  
GLOBE (Ariz.) June 25.—Federal marshals have taken down a placard villifying President Harding, found on a small store on the Superior highway, but have made no arrests.

## Questions Answered

Any reader can get the answers to any question by writing to: Bureau of Frederic D. C. This offer applies strictly to questions concerning law, legal and medical subjects. We do not attempt to settle disputes or give advice on legal, medical and similar subjects. Write direct to the author of any subject. Write clearly and briefly. Give full name and address and indicate if you are near direct to the author.

With return by May 26, 1924.

**A. SON**  
Hotel Building

Are the automobiles brought about the same as in America?

**A. T. A.** The highest tide is in the Bay of Fundy, Can. There is a range of fifty-three feet.

**Q.** What kind of whale are the largest? The length of the longest one captured was 100 feet.

**Q.** At what period did the so-called cave-men live?

**T. C. M.** The cave-men lived between the third and fourth ice ages along with cave-bear, cave-lion, cave-hyena, woolly rhinoceros, Irish elk, and other mammals now extinct which some scientists estimate was from 30,000 to 60,000 years ago.

**Q.** What is meant by brick tea?

**T. M.** Brick tea is a tea prepared in Central China. It is the commonest sort made by soaking reeds such as broken tea leaves, twigs, and dust, in boiling water, and then pressing the tea into mounds. It is used in Siberia and Mongolia where it also serves as a medium of exchange. The Mongols place the bricks on the ground, beat them until they are soft, and pull it downward over the even. He breaks the brick as worthless if it breaks or bends.

**fect the Pacific Electric except finally?**

**(1.) Lower rate of speed at crossings.**

The electric cars should stop at every main highway and slack speed at all crossings. How much time would be lost in three minutes on the average run of twenty miles. Are we in such a hurry?

If the Beverly car had been good ten or fifteen miles an hour, it might have struck the car, but the train would not have been derailed. Let the company put this rule in force voluntarily, and it will go up in public estimation.

**(2.) Lower rate of speed generally.**

There is no necessity for an interurban train traveling fifty or even sixty miles an hour, as they do in some instances. The trains leave over the whole U.S. There are exceptions, of course; the wife who has no household care, and no children, who wants to help out toward building a home, for instance, is more useful and happier in an off-the-teaching school than plowing bridges.

The reckless motorist must be protected against himself. These crossings must be made foolproof.

**(3.) Guarded crossings.**

A wire sign and bars are all common methods of protecting crossings. Bars are more necessary here than at railway crossings, because the electric cars pass much more frequently; they are more silent and just as dangerous.

The reckless motorist must be protected against himself. These crossings must be made foolproof.

**(4.) Overhead crossings.**

This may come a time. It is only a question of expense. Now is anything going to be done to put these elementary measures of safety into effect? Is the Pacific as so powerful a corporation that it can afford to insist in its "public-damaged" policy?

They have the public at fault. In the courts I have seen any individual could obtain a injunction from a Jury and a decree.

The Pacific

in the meantime it ar-

We have the right to demand a stop, look, and then cross on the part of the company.

Are they their in jeopardy every day?

Is there a chance of the company in the future of its passengers the contributory factor?

It is the company that performs a service on the highways to the passengers who are about to speed across the roads.

With the elevators with which they travel, carelessness is the utmost.

## "MY DEAR, USE POSLAM FOR THOSE PIMPLES"

This really happened—I couldn't help overhearing it. A motherly old lady dropped into the seat beside a well-dressed girl. "My dear," she said, "forgive my intruding, but you would be SO pretty if you only had clear healthy skin. Why don't you use Poslam? It did such wonders for my daughters years ago that I can't help recommending it to young folks like you who need it. I just know it would help you!" Her advice was so good that I pass it on to you. You can get Poslam—and Poslam Soap—at any druggist. Why not begin using them tonight? They will often clear away pimples in 24 hours. For trial samples send 10c to POSLAM, 243 W. 47th St., New York.

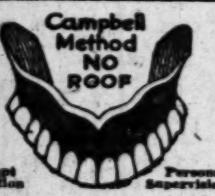

### A Correction

Through error we advertised "All-in-1" washers in Monday afternoon papers at 29.50, whereas the advertisement should have read "2-in-1 Washers". The above illustration is the one that should have appeared in Monday's advertisement.

**— the "2-in-1" Electrical Washer is a regular 63.00 washing machine that we are selling at**

**29.50**

It washes clothes rapidly and thoroughly and dries without wringing, and costs but a fraction of a cent to operate. Machine, including motor, is fully guaranteed against defects. Absolutely one of the finest values we know of in a washing machine. (Hamburger's—Fourth Floor)

### TEETH HURT?

DON'T put off having them attended to. You'll regret it, if you do, when they begin to pain you while on your VACATION. No charge for examination.

**Standard Sanitary Plates (upper or lower)**

**\$12.50**

Crown and Bridgework

**\$4 up**

**DR. CAMPBELL**

8:30 to 5:00 Daily.

**Suffered 20 Years With Cruel Eczema**

Hokara Quickly Heals

"Gentlemen: Words cannot describe the suffering that I endured for more than 20 years from Eczema on my limbs and feet. They were sore and tender that I was obliged to have cushions put in bed to keep the bedclothes from touching me. After treating with different doctors without getting any real relief, my attention was finally called to Hokara. It gave almost instant relief. My limbs and feet were healed and the skin made soft, white and pliable where before they looked like dried beef. I strongly advise anyone suffering from eczema to use Hokara. It is a wonderful remedy. Gratefully yours, A. Gray, Andover, Ohio."

Hokara is a non-greasy, stainless antiseptic cream that goes right to the source of trouble through the pores. All first-class drug stores can supply you on a guarantee of satisfaction or money back.—[Advertisement]

## EXPECT HEAVY COTTON YIELD

All Sections of Texas Report Bright Outlook

Lateness of Season is Offset by Clean Fields

Growers Forecast Increase of 15 Per Cent

**EXCLUSIVE DISPATCH**  
AUSTIN, (Tex.) June 25.—Taking the State as a whole, the condition of the cotton crop is excellent. This is shown by reports from all sections received here during the last few days. While the plants are backward, the season being three weeks to four weeks late in the blackland belt, the fields are exceptionally clean of grass and weeds. It is stated that more cultivation has been given the crop than for many years.

The acreage increase varies so much in different parts of the state that it is difficult to arrive at an average increase. It is estimated, however, that the crop area is 15 per cent greater than it was a year ago.

In the south plains region of West Texas, which is rapidly forging to the front as a producer of cotton, the acreage increase this season is more than double that of last year.

Thousands of acres of ranch lands were placed in cultivation for the first time. In the lower Rio Grande Valley, the cotton production promises to be 100 per cent more than it was last year. In all of south Texas, the crop is in fine condition. Even the dry-land farmers there are assured of good yields, due to the abundant rainfall.

Although the present outlook is unusually promising, there is ample time for the boll weevil and other insect pests to cause great destruction of the crop. It is pointed out, in the Lower Rio Grande Valley, that the danger point has been passed and picking is about to begin there. The boll weevil has made its appearance in spots in various inland localities, but the rate of its ravages is as yet comparatively small.

For the first time in several years the rich valley of the Brazos River may give large production of cotton. The percentage of cotton to the acreage sown for help will be both far exceeded to materialize.

Labor conditions upon the farms are satisfactory, although the immigrant element of workers is temporarily absent in the wheat fields. The supply of Mexican laborers is constantly increasing.

## POMONA WATER RATE IS UPHELD

State Commission Decides for Company

City Authorities Likely to Run Own Plant

Survey Already Made as Operating Cost

(EXCLUSIVE DISPATCH)

POMONA, June 25.—Water rates now charged by the Consolidated Water Company of Pomona were upheld in a decision of the State Railroad Commission received here today. The city had asked for a rehearing which was held here before an examiner of the commission from February 5 to 19, last. The city based its petition for a rehearing on the contention that the rates as charged were too high and that the valuation of the company's physical property did not warrant such rates.

Mayor Osgood and City Engineer Fisher made a tour of inspection of six cities of Southern California to get information on municipally owned water systems. The City Council last week discussed whether action should be taken immediately on the question of the city acquiring its own plant, but took no action other than to wait for the decision of the commission.

Prof. Olds is one of the best known musical directors in the Middle West. He had his college work in Beloit and received an A.B. degree there. He is also a graduate of the American Conservatory of Chicago in piano, voice and theory. He spent a year in Oberlin Conservatory and for several summers now has studied with Oscar Seagle and is with him this summer at Scroop Lake, New York.

He taught voice in Grinnell, Iowa, for four years and then was director of music at Jacksonville, Fla., college. He has taught for fifteen years he has been head of the Milliken Conservatory.

President Victor L. Duke of the university also announced that Prof. Olds will receive a compensation for a year's work as director for a physical education degree from Teachers' College at Columbia University to be in charge of physical education for women. She has charmed the work in public schools for several years and for the past four years has been in Y.W.C.A. physical work.

## PLAYDOM

## "THE CHANGELINGS"

## BRILLIANT CAST IN PLAY AT THE MASON

By Edwin Schallert

Drawing room parties always have the semblance of elegance and sophistication if they are smart affairs. They may occasionally be brilliant, and sometimes dull, but they are entertaining, particularly if the host is a person of savoir faire, and as such no doubt Henry Miller may qualify, especially with the able assistance of Blanche Bates, Ruth Chatterton, Laura Hope Crews, and others who are this week inviting attention to their play, "The Changelings" at the Mason.

Mr. Miller's soles on the coast are now afraid of some moment theatrically speaking, and they occur at that season of the year when the play-world is at its quietest. The life, the pall of dubious midsummer, and they indulge our taste for what is distinguished and sometimes ultra.

It's a lot of bother, really. It requires a tremendous lot of talk, and only a few bursts of hectic action, to put the theme and the theories over. The Victorian faith is fisticuated by the author at one point, and the father takes off his coat preparatory to a bout of which you hear much afterward.

The talk is for the most part epigrammatic, but less down to earth toward the close. The author evidently assayed to a Bernard Shaw, but lost his courage when his sentiment commenced to rise.

Altogether this is not a play for the people nor one for the dials, though it may hold its fair-sized audience in between, for its feeling is feminine rather than masculine.

It would no doubt not be as

actually as interesting as it now manages to be were it for the expert cast. There are noble co-

workers who easily match their

wits and give and take in their scenes.

Mr. Miller offers his drawing room manner at its most gracious, and almost succeeds in what he makes most of the lines that are given them even though those lines are sometimes exceptionally good, and the author has them exact the last tribute out of situations and plot that might be termed at times inordinately arbitrary if not disarmingly trite.

Any perfectly good Freudian would no doubt derive enjoyment out of the psychology involved regarding the domestic calamities, and the reasons why nowadays young people simply don't seem to be able to get along together. There is a bright vein of popular psychology that the writer L. W. D. has tapped here and there. For he convinces you in the end that a sovereign community of interests is by no means the motive

of Chatterton as the young wife. She

for happiness; in other words that clash is often the thing that counts. The Victorian wife leaves the old husband, and John Miller plays evenly and effectively the role of one of the matured misfits. That's not forgetting a splendidly written author like the village author by Fred Kroder. He is a clever type and actor. Walter Baldwin also impressed very vividly as the valet, though this was only a brief role.

The play opens with the apparent disrupting of a young romance between two college students. Though married but still white, the modern woman finds solace only with her Victorian mate.

### PIONEER WORK TAKES VISION

**Private Capital Dares Where Government Fears**

**Cities Purchase Only After Utilities Succeed**

**Municipal Ownership Checks Nation's Initiative**

BY D. T. BABCOCK,  
Partner Blyth, Witter & Co.

Advocates of municipal and government ownership of utilities and railroads, regardless of residence or the extent to which they believe the government should participate in the operation of various industrial enterprises, are like in one respect, namely, they never attempt pioneer development. They wait until private capital has paved the way, and then put forth arguments showing why the government or municipality should step in and take away from the corporations the successful organizations which they have built up.

The history of our country is one continuous recital of progress which can be attributed directly to the fearlessness of men who, believing in its future, invested millions of capital in projects which have aided its rapid expansion.

Railroads were extended into virgin territory with no hope of returns other than those which might be derived from the development of the country. Trans-continental lines, crossing thousands of miles of uninhabited lands, were pushed to completion by men who had a vision of future millions populating the territory to which they brought the markets of the world. It is true that in some instances the government assisted in the construction of these roads but usually with grants of land which, without the railroads, were of no value to the nation.

Yet, after this great system of railroads had been brought to a state bordering on perfection, men possessing no vision beyond their own advancement in a political way, and no real concern for demand that the railroads be taken over and operated by the government. They assert, without producing arguments of merit, that the ownership of railroads is against the best interests of the people, forgetting or ignoring the fact that without the initiative of private corporations, there would be no railroads to take over.

In the case of public utilities the case is practically the same. There never was any serious attempt to nationalize or control the ownership of a utility which is pioneering the way, or one which is having difficulty in developing its growing business. It is only after years of hard-breaking labor, when a utility has been developed into a smooth-running machine that the municipal ownership "patriot" raises his voice demanding that the utility be taken over and brought to perfection by private enterprise to be taken over by the city.

No arguments which withstand investigation can be set forth. Bonds which are supposed to accrue are unreal. The chief stock in trade of the municipal-ownership advocate is an appeal to class consciousness and the promise of lower rates which almost never fulfilled, or, if it is, brought about at the expense of higher general taxes.

In Southern California much of the land under cultivation must be irrigated by water pumped from wells. For power to operate these pumps, ranchers are dependent upon the great hydroelectric corporations which have established a network of wires throughout the State. Yet it is a noticeable fact that in every case the power lines preceded development. Much like the railroads which followed in their wake, the power lines in Southern California have penetrated vast wastes which, made fertile by the magic touch of water, have been settled by a prosperous people.

People are beginning to discriminate between the real and the spurious. They are content to leave public utilities in the hands of the most efficient management. In completion of the various projects, so long as full measure of service is rendered, rather than take them over and entrust control to men whose only desire is to beyond the monthly pay envelope.

The progress of this nation has been in direct proportion to the initiative of its investors, who have placed their funds in enterprises which have been the greatest factor in its development. Should the proponents of government and municipal ownership once gain the ascendancy, the day is soon would the initiative of American industry be destroyed, and the progress of the nation checked.

New Issue

**Ten-Thirty Year  
Federal Land Bank  
4½% Bonds**

Exempt from Federal, State,  
Municipal and Local Taxation

Dated July 1, 1923 Due July 1, 1953

Not redeemable before July 1, 1933

Interest payable January 1 and July  
1. Coupon and registered bonds (In-  
terchangeable) in denominations of  
\$10,000, \$5,000, \$1,000.

**The Supreme Court  
of the United States**  
has upheld the constitutionality  
of the Act creating the  
Bank and exempting these  
Bonds from Federal, State,  
municipal and local taxation.

**The Federal Farm Loan Act** provides  
that the Bonds shall be lawful investments  
for all fiduciary and trust funds  
under the jurisdiction of the United  
States Government.

Price 100 ¼% and Interest  
to yield over 4.45%

to the redeemable date (1933) and  
4½% thereafter to redemption or ma-  
turity.

## White Hills Mining Company

(Mohave County's Comstocks)

This wonderful property—after  
producing over \$9,000,000 and  
never reaching a depth of 500 feet  
became entangled in litigation that  
lasted over a period of twenty years  
—has finally secured clear titles  
and preparations are made to put  
the mine again on a producing  
basis.

Lessors have in the last ten  
months hauled by truck, a distance  
of 27 miles to a branch road of the  
Santa Fe, HIGH GRADE ORES,  
AGGREGATING OVER \$35,000.

Those who have been interested  
in White Hills or desire further in-  
formation should communicate AT  
ONCE with

### BOND QUOTATIONS

**Declining Trend**  
(BY A. P. NIGHTWIRE)

NEW YORK, June 25.—Bond  
prices, with few exceptions, dis-  
played a reactionary trend in to-  
day's quiet dealings. Most of the  
active foreign issues registered  
fractional recessions, and United  
States government bonds dropped  
1-22 to 5-22 of 1 point.

Virginia-Carolina Chemical is-  
sues were pressed for sale, the  
7½%, with warrants, dropping 4½  
points, and the 7½% C. C. Co.  
Debt was down 2½%. And Ameri-  
can Telephone convertible 6s lost  
nearly 1%. Pacific Telephone re-  
financing 6s and Wilson & Co. 7½%  
each had small declines. A portion  
of Railroad mortgages failed to  
make any response to the favorable  
May earnings reports being pub-  
lished, losses of a point or more  
being registered by Readings 4s,  
Norfolk & Western 4s, Smith 6s,  
Katy Adjustment 6s, Interna-  
tional and Great Northern adjust-  
ment 6s certificates and Chesa-  
peake and Ohio convertible 6s.

New Orleans and Southern Mexico  
Income 6s and Southern Railway  
6s, each up about a point, were  
among the few issues to move  
against the downward trend.

Two new issues were made  
today, the largest being the \$45,-  
000,000 issue of Federal Land Bank  
4½% per cent bonds. Announcement  
of the D. G. Derry organiza-  
tion plan is expected within a day  
or two.

Total sales, par value, were  
\$5,407,000.

NEW YORK, June 25.—Following are the clos-  
ing quotations on the New York Stock Exchange.  
Published by Legge & Bryan.

EIGHTH AND HILL STREETS  
The Personal Service.  
Capital and Surplus, \$1,650,000  
Member Federal Reserve System

We Have No Branches

**E**NOUGH lumber is used by Americans each year to build a wooden boulevard to the moon—29 feet wide and a foot thick. At the present rate of consumption, excepting new timber growth, material for only twenty-five such boulevards remains, and most of it is in the Pacific Northwest.

In producing lumber for practical purposes at its large, modern mill on the water front of Portland, Oregon, THE DOLLAR PORTLAND LUMBER COMPANY'S net annual operating profits are estimated by experts at over \$200,000.

Of the available standing timber in United States, this Company owns 1,406,964,000 feet, most of which is the wanted Douglas Fir, worth \$2,462,222 now, and which is increasing in value as the supply diminishes.

We are recommending and selling the Dollar Portland Lumber Company First Mortgage 7% Serial Gold Bonds to conservative bond buyers.

PRICE 100, TO YIELD 7%

May we send YOU the complete description of this high-grade issue?

\$1,438,000

San Diego Consolidated Gas and Electric Co.  
(California)

First and Refunding Mortgage 6% Gold Bonds Series C.  
(Due March 1, 1947)

Price 98 and interest, yielding over 6.15%

Issuance approved by the Railroad Commission of California.  
Company agrees to pay interest, without deduction, for any normal Federal Income Tax up to 2%.

The following information is taken from official sources:

The Company supplies, without competition, electricity and gas to the City of San Diego, California, and vicinity, serving a population estimated at 145,500.

As officially reported for the year ending April 30, 1923, gross earnings were \$3,710,980; net earnings were \$1,325,756, or over twice the annual interest (\$610,280) on the funded debt, including this issue.

The large investment in the property back of the bonded debt is represented by \$4,625,300 of Preferred Stock (paying 7%) and \$3,025,000 of Common Stock on which dividends of at least 6% have been paid since 1910 (10% in 1921 and 1922).

We recommend these bonds for investment and shall be pleased to send circulars describing the issue in detail.

## Complaining in '83

**O**UR population has increased so rapidly recently that many public necessities have not been able to keep pace with the city's growth. This is particularly noticeable in the crowded street cars on Sundays. We counted 35 persons on one car last Sunday."

Newspaper item, May 15, 1883.

**C**overed public utility service is not a new thing. It is a condition that always occurs in times of rapid growth in population. Periods of rapid growth follow periods of slow growth in irregular order, and it is impossible to predict their coming or duration.

**G**Consequently, when building permits suddenly begin to issue at the rate of thousands per month, a strain is placed on the service of such utilities as gas and electricity, which involves the remodeling of entire generating and distributing systems. With a large plant such as that of Los Angeles Gas and Electric Corporation, this is the task of years. The Corporation is gratified with the progress heretofore made, and is in a position to continue to render satisfactory service to its more than 300,000 consumers.

## MEXICAN LOAN BONDS DELAYED

Tardiness in Posting Deposit Unavoidable

Intricacies of Tax Law Hold Up Details

Call Will be Issued Within Near Future

BY JACK STARR-HUNT  
(EXCLUSIVE DISPATCH)

MEXICO CITY, June 24.—The delays in calling for the deposit of Mexican bonds in accordance with the agreement between Thomas W. Lamont, American banker, and Minister of the Treasury De la Huerta have been unavoidable, according to an interview obtained from the American banker by "Excelsior's" correspondent in New York.

No hidden or mysterious reasons exist for the delay, Lamont declared. They have been made necessary by natural causes, he said, and the bonds will be deposited "very soon."

The principal reason for the delay, according to the message from New York, has been the difficulty in finding a satisfactory manner of issuing the deposit call in the various countries because of conflicting legislation. The bankers have been trying to find a way of disposing of the bonds whereby the holders would suffer no further losses through taxation, because the sacrifices they have already made would make them unwilling to purchase further issues.

HIDDEN REASONS

"My attention has been called to reports of hidden reasons why the bonds will not be called in accordance with the agreement between the international bankers' committee presided over by me and Minister of the Treasury De la Huerta. Such reports are unfounded. I wish to say that the call will be issued in the very near future," Lamont told the "Excelsior" correspondent.

"In viewing the situation, it will be seen that the delay was not out of reason. It will be remembered that the agreement was not ratified by the Mexican government until September. Until such ratification is made, it will be practically impossible to make preparations for issuing the bond call as such. It would have been a discourtesy to the Mexican government. As soon as the Mexican government ratified the necessary agreement, the necessary steps were taken, completing the details requisite to issuing the call.

LAW DIFFERS

"The principal detail was preparation of the deposit call, which could be used equally well for bonds deposited in the United States, England, France, Belgium, Switzerland and the Netherlands.

"It would be recalled that the laws relative to tax and duties differ greatly in these countries, in many countries a receipt sent in a certain form is subject to stamp taxes, besides the sacrifice the holders were asked to make in the agreement."

"It is thus necessary to find a formula which will comply simultaneously with the laws of the different countries interested and wherever possible to avoid any unnecessary procedure, but which at the same time would constitute an effective document to legate the bondholders in accepting the conditions agreed upon with the Mexican government.

"It soon became apparent that it would be impossible to arrange all these legal and fiscal questions satisfactorily by cable and some representatives of the American section of the committee went to London last December, where conferences were conducted with the representatives of the various foreign sections.

CONFERENCE SERIES

"These conferences were followed later by another series at Paris. In the course of this work the Finance Minister of Mexico sent a competent commission to examine the different documents which have been prepared in relation to this great plan, and it will be recalled that this commission stayed here several weeks reviewing the entire subject. During my stay in Europe I can assure that I hope the call for the issue of the bonds will follow soon."

"I wish to state clearly again that the delay has been occasioned by purely natural causes. The international committee has always acted with the greatest speed. No strange circumstance has intervened in any way to retard the call. The committee has been working steadily with the end in view of completing and perfecting all the details of the plan."

SAN DIEGO OAKLAND

BY HOWARD C. KEGLEY

Announcement has just been made, by the Shell Company of California, of the election of William C. McDuffie as vice-president and director of that organization with headquarters here. Mr. McDuffie succeeds Paul Paine who resigns June 15 to devote his attention to his own oil interests.

Mr. McDuffie, who was general superintendent of field operations and sales, made a vice-president of the Shell Company now, and director in charge of operations in California. His successor as general superintendent of field operations is William Reinhardt, formerly manager of the Shell activities in the Long Beach field. Mr. Reinhardt has been succeeded at Long Beach by "Happy" Yowell, who has gained considerable fame as a noted oil operator.

Old crop currants are being actively bought up by bakers' supply houses, jobbers and other consumers.

**DRIED FRUITS**

A price of \$7.84c was named today on new bulk Thompson raisins. The new price was a source of keen interest in dried fruit circles when it had been quoted for some time. Sun-maid prices are expected to follow shortly.

Definite prices are not available in new crop apricots; old crop apricots are so variously quoted to no particular value.

Spot prunes are quiet.

Old crop currants are being actively bought up by bakers' supply houses, jobbers and other consumers.

**CANNED GOODS**

The feature of the canned goods market at the outset of the week was the demand of new and new black Columbia River salmon. Opening prices are \$2.60 for cans for one cent flat, and \$5.00 for ovals f.o.b. the Pacific Coast. The above prices are somewhat above a year ago.

A heavy movement is reported in progress in canned salmon for prompt shipment from the Coast. All grades of salmon are having a shade of the 15-cent price have only been in limited demand.

In the absence of whitefish buyers are turning their attention to the other varieties. A year ago opening prices were very well up in price but it is apparently the catch was only 10 per cent of sardines before the new packing season.

Stocks of standard tuna are reported limited on the Pacific Coast although some varieties such as striped, yellow fin and blue fin have only been in limited demand.

In the absence of whitefish buyers are turning their attention to the other varieties. A year ago opening prices were very well up in price but it is apparently the catch was only 10 per cent of sardines before the new packing season.

**SUGAR MARKET**

There was fairly liberal buying of raw sugar in evidence on previous days of the week. Interests at 6 cents cost and freight, an advance of 1-4 cent over previous prices. Futures opened up to 10 points and held steady throughout the session, when regulars appeared and caused the market.

Execution of a stop loss order in March depressed the list materially and at the close active month had sold off to 15 points.

**BUTTER, EGGS**

Further signs of weakness came to the surface in the butter market, and although prices were mixed, it could be seen that last week's closing rates, prices were only lowered 1-4 cent. Call sales were:

25, 25, 25, and 25 tubs creamy extras at 38 1/4 cents per pound for spot delivery.

The egg market is showing hardening tendencies and prices are pointing upward. Pacific Coast white extras, 37 and 38 cents; white extra flats, 25 and 25 cents; flats, 28 1/2 and 30 cents.

**COFFEE MARKET**

In keeping with the decided weakness shown in the Santos market over the week-end there were opening declines of 25 to 40 points in coffee futures here and with subsequent calls indicating a continuation of the decline prices here continued to drop un-

til the end of the month.

There is considerable speculation among big oil operators here as to what representatives of the Sinclair interests are doing in this district. In recent weeks Chester Lar-

vington & Winger interests are making good time in drilling Fuller No. 1. In ten days 2253 feet or hole have been made. A special type of bit has been used for oil in the Hill basin.

A specially treated cutting edge is welded onto the regulation bit, it is said, a more durable drilling end, eliminating frequent changes of bit and assuring better and more consistent drilling time.

## LAND TEACHERS ARRIVE

"School's Special" Welcomed by Delegation from Local Schools and Chamber of Commerce

More than two hundred fair maidens and women, pedagogues of the island public schools arrived in Los Angeles Harbor Saturday evening at 6 o'clock on the S.S. Calawai, which was dubbed for the occasion "The School Ma'am Special." They were met by a committee from the Chamber of Commerce headed by Frank Wiggins and Clarence H. and a large delegation of teachers who supplied the accommodations with which to bring them up from the air to take them for a tour of the city, ending with a dinner.

Frank Wiggins said in welcoming the academic voyagers that the coming generation of Hawaiian citizens would be 100 per cent American and of the highest class of citizen development from the quality indicated in the personnel of the excursionists.

## HUGE NAVY GUNS TO BELCH TODAY

Fourteen-Inch Salvoes Will be Fired by Oklahoma

Last Battle Practice Until September Planned

Two Dreadnaughts to Leave on Northern Cruise

Los Angeles today will experience disturbances from 14-inch salvoes of the U.S.S. Oklahoma, firing the last gunnery exercises on the San Clemente drill grounds until the return of the battle fleet in September. The Oklahoma, provided weather conditions permit, is scheduled to fire her long-range battle guns this afternoon at a range of 20,000 yards. The target will be under tow of the U.S.S. Texas.

Immediately after the Oklahoma fires her guns both dreadnaughts will get underway for Puget Sound without returning to port. The Texas will join Battleship Division One at Port Townsend, while the Oklahoma will proceed to Everett. The U.S.S. Pennsylvania, flagship of the base force, will accompany the two dreadnaughts as far as San Francisco.

At sunset tomorrow the U.S.S. Pennsylvania, the Navy's only 16-inch battleship, will arrive at Los Angeles Harbor for her first trip to Pacific Coast waters. The Maryland is attempting to set a new cruising record for ships of her class and will stop here to take bunkers only, proceeding direct to Puget Sound. She left Hampton Roads on the 16th inst., and is due at Bremerton navy yard on the 20th inst.

The Maryland's run is being watched with interest in shipping and naval circles. If she reaches Puget Sound, according to schedule the 12,000-ton fighter will have established a new intercoastal steaming record for ships of all classes.

Bearing Admiral Hilary P. Jones, commander-in-chief of the entire United States fleet, the U.S.S. Oregon will leave Seattle tomorrow for San Francisco. The fleet flagship will remain at the Sonoma base until early August, when Admiral Robert E. Coontz arrives from Washington to relieve Admiral Jones as supreme commander of the Navy at sea.

## "Two Paramount Questions"

"C.C." When will your refinery project start earning us dividends?

The answer is, almost immediately, inasmuch as my storage is being erected now, and the oil we are buying at \$1.00 a barrel from my syndicates can be disposed of right now at about \$1.55 a barrel, without being refined, provided I could lay it down at the Harbor, and my pipeline to the Harbor should be completed within 90 days, and find us with hundreds of thousands of barrels of oil in hand, on which "we will have made a handsome profit," all this even before we are refining at all, when of course the real big earnings should start to pile up.

The second question is—How often will you pay dividends on this refining issue?

And the answer is—That our present plans are to pay off every ninety days.

"Now, just ask one more question and you pretty near have the whole story."

What do you honestly expect the earnings will actually be?

I will answer that question by saying, that while I am paying up to 40% a month on my oil syndicates, I fully expect the profits from this enterprise to be much greater and certainly lots surer, and I back this statement up by the Government report on the largest oil company in the world, which shows that 10% of their actual profits are made from producing oil, while 87% of their total profits are made from refining and marketing—"nough said."

WALTER IS SHOT  
IN DRUG SELLERNegro Wounds Enemy  
in Main StreetNear Death, Tells of  
Recent QuarrelMan Makes Escape From  
Officers in Auto

Two burglars were killed and a police officer perhaps fatally wounded late yesterday in a pistol battle waged in an automobile that hurtled wildly down First street and crashed into Central Police Station.

Police Sergeant A. W. Bethel is lying in the Receiving Hospital with a bullet wound in his left thigh. His leg may be amputated in an effort to save his life.

The two dead burglars, whom Bethel shot as he was taking them to the police station, have been identified as Melville Bayles and Ed Frohn.

**THREE UNDER ARREST**

Harry E. Bineham, employed as installer by a telephone company, J. C. Hunter, brother-in-law of Bineham, and Lloyd H. Anderson, an ex-contract, all residents of Huntington Beach, were arrested yesterday. They were apprehended at 2565 Vancouver avenue by detectives who went there after they had obtained information from the effects of the dead burglars.

Furs and jewelry found in the bandit's car have been identified by J. C. Wood, whose home at 1445 Cypress Street was robbed earlier in the afternoon.

Several suitcases full of silk, fur, beaded bags and other items, found in the Vancouver avenue house, are believed to be booty.

**MORE GUNS FOUND**

Three revolvers also were found in the Bineham home. Besides the automatic pistol used by the bandits in the fight with Bethel, a bottle of nitric acid, a long dink and some burglar tools were found in the car.

Sgt. Bethel had received a report from the Wilshire Police Station earlier in the afternoon giving particulars of the robbery which took place in this house.

Near First and Hope streets Bayles suddenly twisted about and fired at Bethel. The charge, evidently aimed at Frohn, struck him high up on the left thigh. The other bandit grappled with the officer.

**RETURNS FIRE**

Bethel immediately returned the fire, the bullet striking Bayles just above the ear and passing entirely through his head. A second shot struck him in the right side of the face and a third passed through his body.

When Frohn grappled with the officer, Bethel turned his pistol upon his other assailant and fired. The bullet plowed across Frohn's left shoulder and into his neck, killing him instantly. The spinal column was severed.

The bandit machine, out of control, roared down the First-street hill.

**AT FIRST AND GRAND**

At First street and Grand avenue, Jack Hollenbeck, employee in a drug store, jumped aboard the speeding car and, standing on the running-board, attempted to steer it through the traffic.

The Isaacs Brothers Company plans the improvement of the building in the rear of the lot and shop building, of class-A construction. The building, which will be of unusual design, will be arranged for occupancy by high-class specialty stores.

Officials of the Isaacs Brothers company yesterday expressed the opinion that Flower street in the new future will become one of the principal shopping streets of the city. A number of large buildings are under construction, or are to be built in the near future in the immediate vicinity of the proposed site.

Construction work is to be started by the Isaacs Brothers company.

In the near future on the new building for the Women's Athletic Club, to be located on the corner of the Isaacs property, the Los Angeles Gas and Electric Corporation, which recently purchased 120 feet of frontage on the east side of Flower street between Eighth and Ninth streets, through the Rowan company, is having plans completed for its new office and administration buildings and its new hotel, the Ambassador Hotel, now under construction in the same block, will be ready for occupancy about October 15, next.

(Continued on Second Page)

**PISTOL ENDS TWO LIVES**

We Believe Husband Murdered Wife and Ended

Our Life While Unbalanced Over Ill Health

The bodies of A. V. Harlin and his wife, Emma C. Harlin, were found in an apartment of the Bernard Apartments, 1256 West Third street, late yesterday and it was stated by police that from evidence at hand it appeared that the man had first shot his wife and then placed the revolver against his head and ended his life.

It was stated, and no other information available stated it appeared that he had taken his own and his wife's life after having become unbalanced because of mental illness.

A note was found directing persons finding the bodies to notify E. D. Wilson, proprietor of the Bernard Apartments, about 5 p.m. yesterday.

Wilson, a brother, living at 1715 West Eighth street, No. 8, came to the scene and immediately informed the police. Detective Adams answered the call.

Harlin had been shot in the head while the bullet had caved in his skull.

He was discovered by Mr. Wilson, proprietor of the Bernard Apartments, about 5 p.m. June 25. The police immediately called the police. Detective Adams answered the call.

**READY TO BUILD NEW MUSIC BOX****Contract is Awarded for Hollywood Theater****House Expected to be Open Thanksgiving Day****New York Successes Are to be Presented****Under an agreement signed yesterday, C. H. Simpson, wealthy Santa Monica contractor, was awarded the contract for the construction of the Music Box Hollywood's newest theater.****Moscone and Bordeaux, local architects, have announced that on Saturday they will deliver completed plans of the proposed structure, and ground will be broken next week at the site in Culver City, 300 feet north of Hollywood Boulevard.****According to the agreement entered into between officials of the Music Box Theater Company, of which Nathan Goldstein is president and Judge Craig, of the local Appellate Court, is vice-president, Simpson will construct a \$250,000 building of unique design and seating 1700 persons.****One hundred working days, it has been estimated, will be required to complete the building.****The theater company has****completely financed by local and New York capital, C. V. Riccardi, representative of the corporation, announced yesterday, and nothing remains to be done but to finance and equip the building according to the approved plans.****Mr. Goldstein, who is prominent in the theatrical world, is scheduled to leave for New York during the first part of July, where he will negotiate with New York producers of musical comedy to bring the best musical comedies to the new Music Box of Hollywood.****The Music Box of Hollywood will present only musical comedies of the highest type, the announcement stated.****WILL FEATURE RODEO THRILLS****(Continued from First Page)****Machine. She will also demonstrate trick-riding, which consists of sitting galloping cow-pies from bowstring to rudder; mounting and dismounting from a broncho going full speed ahead; doing handstands and hand-stands in the saddle and making the saddle to do a round-trip by way of the sixth.****Guitar Williams, Byron Roach and Leonard Stroud, steer-bull-doggers and trick riders and ropers, complete the sextet which is due to arrive here today. The out-****AUTO PATROLS FOR CROOKS****Chief Oaks Will Put Fifty Police Cars on Streets; Sees "Cleanest City in United States"****"Los Angeles is the cleanest city in the United States," Chief of Police Oaks said yesterday, in reference to charges that gambling and vice are rampant. "There is less gambling now than there has been in twenty years. Due to the changes that the city is 'wide open,' a great many itinerant gamblers have come into Los Angeles from the East. They found the town closed and the police department is now busy running them out of town before they go broke and turn to crimes of violence.****"Within a month there will be fifty auto patrols at work on the streets, and I expect them to cut down crime to a minimum. We expect the new equipment within a few weeks after the budget is passed. While in the East I learned a great many new methods of crime repression, and these will soon be put to use.****"In the whole country there is no more efficient police department than ours. The traffic department of the New York police has just received \$1,000,000 in new equipment, and I grant that division is better than the Los Angeles traffic force.****AWAITS GRAND JURY****"I am ready and willing to go before the grand jury and testify about the crime conditions in Los Angeles. I welcome a thorough investigation of the subject."****The conference yesterday between the Chief and the Mayor was upon routine matters. The Chief said, and the press association of police graft and inefficiency was taken up only incidentally.****During the course of the conference the organization of a crime-prevention bureau was discussed, but no definite action taken. It was proposed to call in Arthur Eideberg, efficiency expert, to carry out a schedule of police work.****The Mayor also suggested to the Chief that his hours of receiving people be cut down in order to have more time available for the study of repressive legislation.****The Chief yesterday gave out the following bulletin to the department:****WILL BRING WITH THEM FORTY PONIES AND BUCKING HORSES****Drug Suspect Shot Trying to Escape Police****An attempt, by Joe Gonzalez, 22 years of age, to escape from Federal Agents Bright and Lanham last night after they had arrested him on a narcotic charge, was foiled when Agent Lanham brought the fleeing prisoner down with a bullet wound in his right leg.****The officers were stationing agents on the police station after the arrival of Agent Edward Republic street, they reported, when he broke away and ran. Both officers commanded Gonzalez to stop. When he continued his flight Agent Lanham fired one shot, that took effect.****The man, who gave his address as 371 North Main street, was given five years for burglary. He too was transferred to Folsom prison. He was paroled May 23 of this year.****CONFERENCE ON LIBRARY TODAY****(Continued from First Page)****member of the Art Commission and has a vote at the commission's meetings, but he was not present at the meeting of April 4 when the library plans were rejected.****BLANCHARD'S REPLY****F. W. Blanchard, president of the Art Commission, said yesterday:****"The members of the Art Commission will be glad to attend the Mayor's conference and defend their action in rejecting the library plans. The art commissioners have their duties under the city charter and to do their part in seeing to it that the new library will be an addition worthy of the city in which it was built. We have a duty to the taxpayers and we are sincerely trying to perform it. If, after the building was completed, the people would be dissatisfied with it, the art commissioners would be blamed, had we not objected to the plan. The architect is receiving a fee for his services, so he should produce plans that are satisfactory to the people of Los Angeles."****IT IS TRUE THAT MEMBERS OF THE ART COMMISSION DO NOT CARE FOR THE NORMAL HILL SITE.****It is true that under the charter of the Art Commission has nothing to say as to the location of the library or other city buildings, but****the commissioners have something to say as to whether or not the proposed building is suitable to the site.****It has been said that one of our members, Mr. John C. Mitchell, said that he is so opposed to the Normal Hill site that he would not vote to approve any plans for any library building on Normal Hill. It does not seem to me that in an accurate statement of Mr. Mitchell's views. Much as we may oppose the site, we would approve of plans for a library on that site that would do the city****any good. The fee is \$1,500,000, a worthy building."****"Specifically, all to Mr. Goodhue's plans: They call for a low, squat building, 100 feet by 100 feet, with tall bays, a tall Institute Building, and within forty feet of the proposed ten-story Bible Institute addition. The Goodhue library, as now proposed, could be adapted to the Normal Hill site, but it would be unsuitable for Normal Hill. The library would be lost behind tall buildings on all sides. On the Grand-avenue frontage, instead of a building which is the library, there is the Goodhue plan, several one-story bungalow-like buildings tacked onto the main library."****"The Goodhue building looks more like an expedition building than a classical public library. In our opinion, if the present plans were approved by us and the library would be dissected with the other buildings, it would be more useful and important and that it was designed to play a more important part in the interests of the newly formed nations and thus as a stabilizing force for the world."****"City Attorney Stephens has filed an application with the Municipal Art Commission, and that is the only power the commission has over the building. The commission extends only to the design thereof.****There are certain matters in connection with which the commission must pass judgment, however, as far as the design of this case, the public library is covered by Section 279 of the city charter, which you will observe—does not include the location.****Promised at today's conference in Mayor Cryer's office will be the members of the Municipal Art Commission, who are F. W. Blanchard, Mr. M. J. Johnson, J. J. Backus, Mrs. Cecil B. De Mille and Mrs. Charles F. Gray, and Mayor Cryer and City Engineer Griffin, who are members ex-officio, and the members of the Board of Education Directors—Orra E. Monette, president; Frank H. Pettigill, Francois M. Harmon-Zahn, Rev. Francis J. Conaty, and Katherine G. Smith.****SMALLING MARBLE CAUSES BABE'S DEATH****NO CHOICE OF SITE****The City Attorney's opinion says:****"It will be difficult to change the charter provisions in connection with the power of the Municipal Art Commission, and find that insofar as public buildings of this nature (the public library) are concerned, the commission has no power to change the location of the building."****CITY ATTORNEY STEPHENS****FORBIDS CHANGES****IN LIBRARY PLANS****MAINTAINS PLANS AS THEY ARE****NOT TO BE CHANGED****BY CITY ATTORNEY****JOHN C. **INVESTORS LAUD WAR ON DRUGS**

New Work of Citizens' Committee of 100

Narcotic Education Day at Exposition July 21

Organization Now Perfected to Combat Evil

Statement of the work of the Committee of 100 in bringing the public to the evils of narcotic habit and traffic commission of the activities of the International Narcotic Education Association and recommendations that members of constituent bodies co-operate with the committee in this work was given in Los Angeles yesterday.

The statement was made by the committee that the International Narcotic Education Association and its members had adopted the Los Angeles Plan of Action.

The movement of the work of the committee has been a tremendous success. The committee of 100 has organized a permanent organization to take the lead of citizens in combatting the evil of narcotics.

Through the action of the International Narcotic Education Association, the committee has been given a permanent organization to combat the evil of narcotics.

The board already has issued vouchers for \$225 for tentative plans submitted and County Auditor Payne yesterday refused to pay this voucher on the advice of the County Counsel.

**PLANS FOR MEMORIAL RULED OUT**

Counsel Hill's Decision on Exposition Park Building to be Tested

A. J. Hill, County Counsel, yesterday ruled that the Board of Supervisors is without authority to provide funds for the construction of the proposed Memorial Building in Exposition Park.

A test case is to be carried to the courts at once by a committee from various patriotic societies, including the American Legion and the relatives of Walter J. Tuller, Burton Flits and Mendel Silberman, attorneys.

The ruling, if upheld, would throw out similar buildings being planned or under construction in fifteen California cities. The proposed structure in Exposition Park would cost \$500,000, and would be used as a meeting place for all patriotic societies in Los Angeles.

Mr. Hill's ruling was that such construction from public funds would be unconstitutional because the general public will not be admitted to the building, and it will never deserve the use of only a part of the citizens.

The board already has issued

vouchers for \$225 for tentative plans submitted and County Auditor Payne yesterday refused to pay this voucher on the advice of the County Counsel.

**TRANSPORT HERE WITH GIANT GUN**

Edgemoor Reaches Port Through Heavy Gales With Ft. MacArthur Armament

Buttered by heavy gales and high seas and twice forced to seek shelter in harbors on her way from the Panama Canal, the transport Edgemoor arrived in the harbor here late yesterday afternoon carrying a 14-inch rifle for Fort MacArthur and 10,000 tons of ammunition and Army stores for San Francisco and Honolulu.

The vessel suffered no real damage during the voyage but the constant gales and heavy seas made the trip so dangerous that the ship sought shelter at Acapulco and Manzanillo harbors, officers stated.

The Edgemoor was under command of Gen. Cox. Several times during the voyage the Gen. Cox was in distress, it was stated, but managed to weather the gales after undergoing repairs at the two harbors.

The new seventy-ton gun brought here by the transport will be mounted at Fort MacArthur, making it the strongest coast defense point in the country. The cargo of ammunition, it was said, is the largest ever sent to the Hawaiian Islands. It is valued at \$3,000,000.

**WHITTIER'S TO RETURN FOR BURIAL**

Wife's Death Here Recalls Oil Man and His Daughter From Hawaii

A radiogram received yesterday from M. H. Whittier, vice-president of the Rodeo Land and Water Company and one of the most prominent oil men in California, his daughter, Miss Helen Whittier, stated that they would leave the Hawaiian Islands tomorrow for home on the Matsonia, for return home for the funeral services of the wife and mother, Mrs. Joanna Whittier, who died Sunday afternoon at the family residence in Beverly Hills.

The message was an expression of grief from the father and daughter who had left Mrs. Whittier apparently upon the road to the Orient. They do not plan to return to the Hawaiian Islands on the City of Los Angeles which arrived at Honolulu at 6 p.m. Sunday. In the meantime, their funeral arrangements have been made in charge of H. L. Weisbrod, close personal friend of the family, who will await the return of the husband and daughter before arranging their departure.

Mrs. Whittier had been ill for

several months but was recovering and only a last-minute change in plans prevented her accompaniment. Mr. Whittier, who had felt that the strain of the trip might not be good for her,

She was born in Illinois and comes to California and Los Angeles in 1900 and has been here ever since. She was married to Mr. Whittier in 1900. She was considered one of the most popular young women in Los Angeles before her marriage and she has taken her place as one of the most active club women and charitable workers in the Southland. Mrs. Whittier is known as a veritable writer of talent and stood high in the esteem of her many friends in the Woman's Club and Elbe Club of Beverly Hills and the Woman's Lyric Club.

She leaves the widower and daughter, three sons, Donald, Leeland and Paul Whittier, the father, H. L. Weisbrod, and a foster sister, Mrs. Claude E. Coleston of McKittrick, Cal.

**JOLLY MEN ARE POINTED OUT AS WHITE KNIGHTS**

Wife Lost Street Brawl, Says Mate Who is Seeking Divorce

An asserted street fight May 22 last, in front of the City Hall at Covina, between his wife, said to be of Amazonian proportions, and a smaller woman, in which his wife suffered a dislocation, was mentioned by Eliza Mathis Henderson in divorce action filed yesterday in Superior Court against Mabel Woodward Henderson. This asserted fight, which Henderson asserted was extremely hurtful to him, was said to have started over a remark made by Mrs. Alberta Bieser regarding Mrs. Henderson. Mrs. Bieser, at the time she was accosted by Mrs. Henderson, was accosting a boy, Henderson said. The infant was deserted during the frantic combat, he said.

In addition to charges of desertion, Henderson accuses his wife of familiarity with other men. He mentioned specifically N. B. Woodcock.

Familiarity with other men, from whom he said she accepted money, is charged by Henderson. He said that his wife often drank intoxicants to excess.

The complaint was prepared by Attorney Dailey S. Stafford. The couple were married in San Bernardino in 1920 and separated on May 22 last.

Sancieri's identification was supported by the testimony of his brother, Jim Sancieri, his half brother, Mariano Sancieri, who declared that the four defendants were the men who came to the Sancieri home and took Frank away on the pretense that they were officers from San Fran Police Station who desired to question him.

Dep. Dist.-Atty. McClelland was called to the witness stand and testified that W. V. Jolley came to his office and asked for a complaint against Sancieri and upon the Deputy District Attorney's refusal until further investigation could be made, remarked on his way to the office that he knew another way to get justice.

Dep. Dist.-Atty. Burton appeared for the State, while H. L. Gelster represented the defendants.

**GIRL WITNESS IN JULIAN CASE IS REPORTED SICK**

Metal Taken From Ashes of Cremated Persons is in Hands of County

The Los Angeles County Treasurer is in possession of almost two ounces of pure gold and he doesn't know what to do with it.

The gold was sent to him by N. R. Martin, superintendent of the General Hospital.

It was taken from the ashes of 250 persons

who have been cremated in the hospital crematory since August 15, 1922.

Under a ruling of the county counsel, it is not permissible to remove gold fillings from the teeth of persons who are buried or cremated by the county. When the bodies of persons who died at the hospital were buried, their gold teeth were buried with them.

Since none of the crematory was established, the gold has been removed from the ashes. And the ashes of 250 persons have produced two ounces of gold.

The treasurer is undecided whether the relatives of the deceased shall be given a price rate for the gold or whether it shall be devoted to public purposes.

The treasurer is undecided whether the relatives of the deceased shall be given a price rate for the gold or whether it shall be devoted to public purposes.

**LETTERS MINUS PROPER ADDRESS TO BE RETURNED**

Records for speed and hilarity were broken in Judge Reeve's court yesterday when Bailey Stroud, a negro, was convicted by a jury of second-degree burglary.

The entire case, including the selection of the jury, took just an hour and half.

The spectators and the jury were kept in constant good humor by the evidence.

Stroud was convicted of breaking into the apartment of Justice A. Rocha at 1143 South Olive street in March, 28, last, and taking \$15 from a purse. While the intruder was in the apartment, Miss Rocha entered.

The negro escaped from the window, alighting on the pavement below on his shoulders. An Alendale dog attacked him, seizing his coat-tails. The frightened man retreated to a nearby garage, where the dog firmly attached to him.

He was found in a corner of the garage, where the enraged Alendale stood guard over him.

Director services, however, will be given misdirected registered, insured C.O.D. and special delivery mail of all classes.

Inoculating Chickens

A county farm agent in New Jersey has vaccinated 4,000 hens with a serum, protecting them against chickenpox, croup, canker and pneumonia. The serum, injected under the wing did not interfere with laying.

**CHANCE FOR POSTAL AID IS BRIGHTER**

Postmaster Believes Visit of Washington Official Will Bring Needed Relief

A radiogram received yesterday from M. H. Whittier, vice-president of the Rodeo Land and Water Company and one of the most prominent oil men in California, his daughter, Miss Helen Whittier, stated that they would leave the Hawaiian Islands tomorrow for home on the Matsonia, for return home for the funeral services of the wife and mother, Mrs. Joanna Whittier, who died Sunday afternoon at the family residence in Beverly Hills.

SIRIUS QUESTION  
So far as Hollywood is concerned a fixed star is one with a five-year contract and \$1,000,000 in Liberty Bonds.

BY THE WAVES  
They are having a censorship at Atlantic City. A board of a dozen men and women review the Sunday bathers at this eastern resort and drive away the wearers of one-piece suits that permit much display. The bathers there are urged to emulate the modest behavior and attire of the seaside sisters at Long Beach.

A MONG THE DEAD ONES  
Delvers at Duxbury are thought to have dug up the bones of Miles Standish. The last resting place of the captain has not been definitely known, although he expressed his purpose to be buried beside his daughter and daughter-in-law. Men putting in new water mains in Duxbury exhumed three skeletons within 300 feet of the site of the old Standish homestead. One was that of a man and the other two were palpably the bones of two females. That is why the Duxbury folk are inclined to believe that they have tapped Miles's private burying ground. Over in England an American crusader has been trying to resurrect Pocahontas. Nobody seems willing to let the dead rest in peace.

A MILLIONAIRE CHURCH  
There are several churches in the country that are not worrying about paying the preacher. The richest one in the world is the Trinity organization in New York, which has a billion-dollar graveyard. The annual statement of the church, which has just been given out, shows that the income for 1922 was a trifling matter of \$125,000. Of this \$220 was pent rent, so it may be seen that the church does not rely upon its rents for its revenue. In fact, Trinity took in over \$1,100,000 from the rental of buildings and lands owned by the body. The church gave \$80,000 to the pastor and his assistants. Religious property is exempt from taxation, but Trinity pays nearly \$200,000 a year in taxes on its business holdings. The assets of the church are nearly \$15,000,000 and there are upwards of 10,000 communicants in the parish. There are five services a day and the mother church is open all the time. Trinity is not merely a wealthy church, but is one of many everyday activities of human interest.

A IR. SLAUGHTER REGULATED  
Another commendable effort to mitigate the horrors of war by limiting the scope of aerial bombing has succeeded in effecting regulation of military aircraft-on paper. A list of rules, based chiefly on an American craft, approved by The Hague Commission, has been transmitted to the world.

The rules adopted, if rigorously adhered to by nations at war, will remove one of the most terrible menaces to civil populations, that of seeing innocent lives snuffed out by poison gas bombs and the homes and properties of noncombatants ruthlessly destroyed.

Rules and regulations, however, easily adopted and acquiesced in by nations in their peaceful intervals, have an uncanny way of blowing up when the work of the moment is by hook or by crook to beat an adversary to his knees. In that case acts of prohibition, unbacked by enabling bills, are hastily crumpled into the waste basket.

Unfortunately the nations of the world are not yet wise enough or brave enough or decided enough to put teeth into the acts they subscribe to in times of peace so as to make them binding in times of war.

There is no way of disqualifying a nation that disregards the accepted rules for playing the war game. There is no umpire or referee to decide on the spot a foul tackle and to penalize the offender. Whether an offending nation is punished or not for not playing fair depends entirely on which side finished winner or loser.

A provision to prohibit the bombardment of buildings not directly connected with military operations is wise and proper. But a warring aviator flying over England at the rate of 120 miles an hour at an altitude of 10,000 feet might well drop a bomb ostensibly to destroy the Woolwich Arsenal—a legitimate war act—and have it land on the Bank of England. German aviators found it a hard job to hit the city of London. To have picked a building employed in war work and destroyed that alone without damaging noncombatants would have been an impossible operation as the one offered Shylock for getting his pound of flesh.

A church, hospital or art gallery, says another provision, shall be exempt from aerial bombing unless it is being used for military purposes by the adversary. An imaginative or highly nervous observer might easily see a proscribed edifice as a military threat and order a bombardment either by mistake or through malice.

All efforts to humanize war are worthy and in the right direction. Under present international conditions they are probably all the relief suffering humanity can expect. But the only safe way to humanize war is to do away with it altogether.

SLANDERING OUR ANCESTORS  
Shocked and saddened by the successive waves of violence and destruction that have swept over Europe and parts of Asia during the last ten years, educators in many countries are asking in all seriousness whether the accumulated knowledge of the ages is not menaced, whether civilization is not being thrust back into the Dark Ages.

Such references to medieval times are unfair to the generations of that period. They laid the foundation for the civilization of modern times. They were the greatest builders of history. They planted the seeds that later bore the fruit of democracy. It was during this period that the art of printing was discovered, making possible the wide diffusion of knowledge. They solved in isolated communities the problems of self-government that were later applied to the government of great nations.

While cruelty and brutality existed they were largely due to ignorance and superstition. There was naught of the refined cruelty of science by which Europe is now cursed. While there was less enlightenment there was more sincerity.

Now was that period more bloody than the present decade? Wars were not so numerous. There were whole generations when Europe was practically at peace. And many of the wars were fought to repel invasions from Asia. As one reads the history of that period the wonder is not that there was so much cruelty, but so little.

The Europe of today is as brutal and unscrupulous as the Europe of the Middle Ages, and its ideals are less lofty. Materialism has wrought havoc with the best that was built during generations of faith. From a moral point of view a return of the customs of the Dark Ages would be an advance rather than a recession.

It has become plain to the thoughtful that there was something faulty in the civilization of the nineteenth century, a moral defect that produced the present collapse. And it is patent that the fault must be corrected before the forward march of civilization can be resumed.

This defect is to be found in the form of government. All Europe's present woes can be traced directly to failure of administration. Governments are able to maintain interior peace; but they collide with each other, like automobiles at crossings. Collective administration has proved a failure.

Added to this is the spirit of materialism that lives only for the present. It is this spirit that gave birth to Socialism and that is responsible for the tragic history of Russia during the last five years. Altruism is the spirit of personal sacrifice for the good of humanity. It is based on the Sermon on the Mount. Materialism is purely selfish. It goes no further than the immediate wants and passions of the body. Denying the existence of the soul, it makes no reckoning of moral rewards and punishments.

Those who are now devoting themselves

to a study of social conditions in Europe

find that wherever the materialistic spirit predominates there is discontent most prevalent. Peoples who have lost their moral sense have no regard for the rights of others; for materialism teaches that one should take what he wants where he finds it; that regard for the rights of others is maudlin sentimentalism, an evidence of weakness.

Europe is now ruled mainly by the right of the strongest. The weaker are always in the wrong. Plundering a neighboring people is considered justifiable, providing it can be done without too great a sacrifice.

Before the stately march of progress can be resumed the peoples of Europe must come to recognize that they have destroyed through materialism the very things that make life worth while. In destroying faith they have left people without ideals.

If there were prospect of a return to the faith of the so-called Dark Ages without its intolerance it would be regeneration for Europe, not a decadence. Science has made the material life of peoples more endurable; it has discovered methods of applying the power of the blind forces of nature to perform the labor that once wrung the perspiration from the human form; but it has developed a defective side; for it has robbed some peoples of their faith. Faith and love are inseparable. When faith vanishes love soon grows cold and turns to

Russia to pay her own labor with. Germany, moreover, has as shrewd a commercial brain as any of her competitors and is possessed with a desire for production.

So, while America has the gold to buy,

Germany is getting together the goods to sell. Germany is securing what will be a valuable asset—supply of the cheapest

made goods in the world to dump on the world's markets. Mr. Goodenough prophesies that Germany will capture the foreign trade once held by America. A nation that has the goods to sell and needs money is better off than a nation that has gold but cannot buy, but cannot sell what that gold has paid for.

Perhaps, to put it briefly, this foreign

critic implies that Germany, being down to

bedrock, cannot sink any lower and so must start to rise, while America, on the top of the loftiest peak, cannot rise any higher and so must start to come down, since there is no such thing in this world as standing still.

Nobody, however, has measured the highest or the lowest or can say where farther ascent or descent has become impossible. And as for high-priced manufacturers being unable to compete with the products of cheap labor, American producers, protected by adequate tariff laws, have been consistently successful.

Despite the advances of science, there is

more inhumanity in the Europe of 1923 than there was in the Europe of 1913.

YANKEE GOLD AND GERMAN GOODS

One of England's leading bankers, F. E.

Goodenough, has restated an old European complaint in a new form, capable at any

rate of interesting discussion.

The old complaint is the accumulation of gold in America to the deep distress of the bereaved Europeans. The new form is Mr. Goodenough's contention that in the long run America itself will be the chief sufferer from its present surplus of wealth and that Germany, the country without a currency, will be the nation ultimately to benefit most by it.

Mr. Goodenough, referring to the gold lying inactive in the American strong box, says: Its only use is to back American credits which would still be the surest in the world without this abnormal gold reserve.

In another direction, he opines, it will prove a hindrance to American trade development by raising the price of American-made goods to the point where they will be unable to compete for the foreign markets of the world. An excess of gold brings high wages and high prices to the nation in question. The United States has entered this pleasant stage.

But as to the effect on the country that has the gold, says the British financier, sooner or later inflation must accrue and prices soar, making inevitable the loss of its foreign markets." Good times would continue till the home market was fully supplied and then, there being no foreign market to take the surplus, the inevitable slump would follow.

Business would have to shut down till the home market was able to absorb the leftovers from the lost foreign markets and all the world's gold held in cold storage wouldn't feed the hungry or allay the unemployment sure to occur in the interim.

Such is the fate, according to this British financial expert, of the nation overstocked with gold—her products can only be sold in her own borders. A nation so complex and so powerful as the United States cannot live on its own fat for half the year like a hibernating bear. It will lose something more vital than gold.

At the other end of the scale is Germany, with no currency of any value outside her own boundaries, but with the cheapest medium of exchange in the world (barring

DUST AND DISEASES  
A gram of New York City dust (weighing about as much as a pin), from the floor of a Broadway hotel, and another gram from a Fifth avenue church, each yielded approximately 360,000 bacteria, among which were identified germs producing dysentery, diphtheria, colds, influenza, pneumonia, whooping cough, measles and scarlet fever; otherwise, the samples tested quite sanitary. New Yorkers are rather boastful of the showing, because dust from other eastern and southern cities yielded from 500,000 to 2,000,000 germs to the gram. It used to be thought that, in Southern California, where the people, building up a new metropolis, naturally "raise the dust" and where the climate is never cold enough to freeze the germs, bacterial epidemics would be of frequent occurrence. As a matter of fact, however, life insurance has proved a better risk for the companies in California than in any of the Eastern States. Bacteriologists have discovered the reason; they say bacteria live through the winters, even in New England as well as in California. Like seeds, the tiny organisms encyst and remain quiescent until the coming of spring, when warmth plus moisture in the air causes them to germinate and multiply. Warmth alone is not sufficient; humidity is as necessary to bacterial reproduction as summer showers are to seeds. Southern California has dust and warm weather to spare, but lacks dampness; hence bacteria remain as dry as the dust. That they are less ravenous than along the Atlantic Coast appears in the fact that fruits, vegetables and meats keep fresh in household refrigerators three or four days, whereas the average for the Mississippi Valley and Atlantic States is from twenty-four to thirty-six hours—less than half as long as in Southern California. Dust is dust everywhere, however, and the gentle art of dusting should not be neglected to keep the house clean.

MORE TROUBLE  
A naval expert calls attention to the fact that if a twelve-mile limit should be placed around our country instead of the present three-mile affair it would be twelve times as hard to patrol it. Most of the ram-running is done by rather small craft and these would be beyond the range of the natural eye. Seems as if there was a knock on everything.

RIPPLING RHYMES  
PROSPERITY

Prosperity resplendent is with us once again; well-fixed and independent we find all busy men. There's work for every fellow, and wages by the ton; we hear employers bellow, "A job for everyone!" The hammer and the chisel are busy every day, and he's a hopeless fizzle who loafa

s, and these would be beyond the range of the natural eye. Seems as if there was a knock on everything.

THIS IS THE DAY

The battle of Mechanicville, the first of the seven days' battles near Richmond in the peninsula campaign of 1862, started the most disastrous campaign for the Union army in the Civil War. Gen. George B. McClellan commanded the Union army and Gen. Lee the Confederate army. The battle was fought on May 27, 1862, and the Confederates were defeated. McClellan's forces suffered heavy losses, but the Confederates suffered even heavier losses. The battle was a turning point in the war, as it was a turning point

## FLESH FOODS ON THE MENU

Alma Whitaker and Chef Wyman Tell How to Make Any Cut Delicious

[Recipes in this section are by Chef Wyman and Alma Whitaker, both famous cooks.—Ed.]

Of course, it takes a pretty poor cook to ruin the best and most expensive cuts of meat.

But after all, you know, good cooking is three parts "attention"—and a good cook can make the cheaper cuts taste vastly more succulent and render infinitely more nourishment than a most expensive cut in the hands of a poor cook.

There are numerous occasions in most people's lives when they may have the cheap cuts or none. And as such families usually have slight leanings toward vegetarianism it behoves the housewife to learn how to cook cheap cuts tenderly to justify her maternal existence.

On this page are a few ways to make cheap meat tender, tasty and nourishing.

It may be said right here that "frying" is about the most unsatisfactory way to cook cheap meat. It is quick and easy—and that's about all.

### BEEF STEW

Tions for making meat tender.) Cut up a large onion, two carrots, and a small turnip, and a piece of celery if in season, and fry these a light golden brown in beef dripping. Add them to the casserole dish. Then add a pinch of pepper, a sprinkle of nutmeg, two whole cloves, and a tiny piece of mace. Cover them with cold water, and bake in a medium oven for an hour and a half, keeping the lid tightly closed. Add a little

thickening before serving, and garnish with snippets of toast.

A variation of this is to substitute two whole fresh tomatoes for the carrots.

Or, twenty minutes before serving, add a cupful of young green peas.

When you suspect the beef of being quite sinfully tough, try dipping it quickly in vinegar and drying it on a clean cloth before cooking.

### SHOULDER OF LAMB

Carefully remove the blade bone with a sharp pointed knife.

Then make a dressing of two cupsfuls of fresh grated bread-crumb, one chopped onion, a tablespoonful of fresh leaf thyme, a little chopped parsley, a chopped kidney, and a little grated lemon peel. Mix these ingredients well and bind together with a well-beaten egg. Fill the pocket left by the blade bone with this and tie snugly with white string.

Place in baking pan with meat dripping, if possible. Otherwise, add a cupful of water. Put into a very hot oven, turning the gas low after five or three minutes. Cook twenty-five minutes for every pound of weight, and baste twice during the time.

Serve this with either rich brown gravy or white onion sauce. The onion sauce is made by simmering onions in milk, with a piece of butter as large as a walnut, a little pepper to taste, and thickening with flour when the onions are tender.

Place the steak in thin slices about three inches wide, and five inches long. Roll each round a generous filling of the dressing and skewer them on the ends of the skewers.

Lay the rolls in a casserole dish or closed baking-pan, with a layer of bacon fat. Pop into a hot oven and bake for about three-quarters of an hour.

These are very good served with mashed potatoes and beans.

The meat should be put into boiling water with a little salt, sugar, and a pinch of soda, the water barely covering them. They should be boiled for about twenty minutes, no longer. Then they will be tender and retain their fresh greenness. All the water should be strained from them.

### LAMB STEW

Shoulder lamb stew is best, but the neck and breast do very nicely.

For two pounds of meat cut up two good-sized onions, three large turnips and six potatoes, and boil in a roomy kettle, and just cover with cold water. Bring to the boil very slowly and allow to just simmer for two hours.

When cooked, but not overcooked, just as it is when cooked, but overcooked, is obtained by cooking in less water and adding half a pint of milk just before dishing up. Then thicken the liquid with flour, and add chopped parsley just before serving.

When the lamb is lean and not too bony it is good cooked in the casserole dish, like the beef stew. Beans, previously soaked for half a day, are a good substitute for the potatoes.

Celery, too, can be substituted minutes.

Cold meat that has not been overcooked is good for this dish. If fresh meat is used it should be cut in small pieces, not ground, and fried briskly—preferably in dripping of its own kind, beef dripping for beef and so on, for about five minutes.

Here's one way to make a good

ket reports.

### PREVIOUS ATTEMPTS

Several previous attempts had  
been made, in recent years, to es-  
tablish union stockyards in Los An-  
geles, but these efforts failed owing  
to the consistent opposition of the  
Cattlemen's Association, which op-  
posed the establishment of stock-  
yards on the ground that the pro-  
ducer who undertook the expense  
of establishing a stock market  
was placed at a disadvantage,  
and unless he was willing to  
accept such prices as he could  
get at the central market, was  
forced to sell his stock to the  
ranches at his own expense.

Under the system which prevailed  
prior to the establishment of the  
local yards, and which still pre-  
vails in the market, the producer  
who have no endorsement of the  
central market plan, Los Angeles pack-  
houses sent their representatives  
into the field, purchased the stock  
on their range, and arranged for its  
shipment to their respective plants  
in Los Angeles.

While this system had certain  
advantages for the larger pro-  
ducer of live stock, the small pro-  
ducer, a good citizen, was finding  
a market, since he did not have  
enough stock to sell to attract  
the representative of the big pack-  
ing firms.

The new Los Angeles Union  
Stockyards not only furnish a mar-  
ket for the big producer, but for  
the small producer, who can ship  
by truck or by mixed carloads, and  
find a ready market for his stock.

Officials of the stockyards are en-  
couraging, as much as possible, the  
small producer of the smaller  
units, and every small farmer in the South-  
west for market, and with the es-  
tablishment of this plan, an enormous  
amount of stock will be available  
for the packing plants.

**FOUNDED IN 1921**

The Los Angeles stockyards had  
their inception in the latter part  
of 1921, when J. A. McNaughton  
of Chicago visited Los Angeles to  
investigate the possibilities of the  
establishment of stockyards here.

He reported favorably to his asso-  
ciates and his recommendations  
were submitted to J. A. Spoor,  
chairman of the group of busi-  
nessmen continuing around the Chi-  
cago Stockyards. Mr. Spoor im-  
mediately approved the plan.

Shortly afterward a large tract  
of land on the southeast side of  
the city, between Los Angeles and  
the harbor, was selected and  
construction work on the stock-  
yards opened the following No-  
vember. The stockyards were the  
first, and central unit of the plan  
of development, the Chicago suc-  
cessor of the company, to be dis-  
tributed here. Around the stock-  
yards there will be a great man-  
ufacturing center, to be served by  
a junction railway connecting with  
all railroad lines entering Los An-  
geles.

The officers of the Los Angeles  
Union Stockyards are J. A. Spoor,  
Chairman of the Board; H. E. Po-  
ronto, president; A. G. Leonard,  
vice-president; J. A. McNaughton,  
vice-president and general mana-  
ger; and F. L. S. Harman, secre-  
tary and treasurer.

## Of Interest to Women.

### THE LAST WORD. BY ALMA WHITAKER

ALICE AND ELLIOR

argument between Alice Duer Miller and Ellior Glyn is over now, told the motion picture-author conference that wanted to see more "woman's women" on the screen, they of the vapid merely pretty flappers and vampish heroines before, and that motion-picture audiences were made up of women, the sex is crying out for a normal, intelligent breed who has a few other things in her head besides a consuming admiration.

Ellior comes back with a woman. She remarked caustically of any such thing. She wants to be sure that she would never find another girl unless she could surpass the whole show herself and the men be sugared.

Of course, Ellior would never say a woman's womanly thing like that. She is a woman of a generation whom she had some romantic interest.

In fact, Ellior adores men

in the abstract and the ideal, but would like to hang draw and individually.

Alice, on the other hand, isn't exactly obsessed with the idea of masculine superiority in general, but she has a marked and pleasant respect for the sex in numerous individual cases. And this woman's woman was found infinitely more comfortable to work with. But Ellior is a man's woman.

WHICH IS RIGHT?

All the same, of course, we should search our hearts, sisters, on this very vital question. Is Alice or Ellior right about that?

We are the arch-patriots of the movies and it is true that we shall probably ultimately get the sort of heroines we really want to see.

Is this young person a vapid, pretty girl, or is she an intelligent, modern, womanly comedienne, or, must we have either extreme?

For my own part, of course, I like the woman's woman with a wrinkle in her eye, who is not exactly entirely selected by the romantic set, is not wistfully inexperienced, and manages to disguise any suffragetteism for which this is the ideal woman.

Nene of the really popular women's woman I know some under Ellior's description of being "unsuccessful in charming men." But, of course, Ellior doesn't really know much about women's women.

Whereas, on the other hand, both Alice and ourselves know a great deal about women's women. When the men have failed them, when they have outlived their liking, they usually turn to the woman's woman, the last sure haven. And the woman's woman never fails them.

SEE GETS HER SHARE

The woman's woman has usually acquired a share of the full shore of this world's romance and is content to rest on her laurels. Having settled that side of her nature comfortably, she has a sympathetic and intelligent interest in numerous other matters.

But a man's woman's romantic years are never quite satisfied and any serious interests otherwise are too alluringly diverted to the main issue of women's romantic whims to conquer. Which is delightful to masculinity when she is young and pretty, and a confounded nuisance when she has changed subsides.

In the meantime, there are marked signs that quite a number of men are revising their tastes. It was men you know, that coined that word "dumb-bell." It may also be noted that men and women read Alice Duer Miller, Gertrude Atherton, Katherine Tynan, Mrs. Humphrey Ward and the works of other woman's women—whereas only men read Ellior Glyn without synecdoche.

HOPELESSLY OUT OF DATE  
So perhaps what Alice was real-

ly saying was that both men and women are tired of seeing men's women on the screen because the breed is worn out.

And perhaps Ellior was largely right, too, because we do want to see the sort of women men really admire.

Women, the sex is crying out for a normal, intelligent breed who has a few other things in her head besides a consuming admiration.

So when we get right down to rock-bottom we probably all want the same sane intelligent practical, lively, healthy, tomboyish, good-looking, reasonable sort of heroine, with a heart and a head, and a figure, all functioning efficiently, with just enough taste to give her a sense to know when, where why and how and how much.

### HOUSEHOLD SUGGESTIONS

#### Washing Glassware

When washing fine glassware put it in the hot water edgewise, but if put in bottom first it is apt to crack from sudden expansion.

#### Stewed Tomatoes

Add a slice of onion to tomatoes when first put on to stew. It will be removed before thickening the tomatoes but the flavor will remain.

#### This and That

It takes patience to be a good cook.

#### Rub the creaky closet doors and bureau drawers with soap.

Wipe the greasy hands palms occasionally with soap water.

#### Throw some rock salt on the slow fire and see how quickly it will burn up.

Boiling soda is a splendid remedy for rashes such as prickly heat, poison ivy, etc.

Be sure to thoroughly dry the iron frying pan after washing. It rusts very easily.

#### ARE WE SOON TO BECOME A RACE OF BALD-HEADED MEN?

#### PROF. JOHN H. AUSTIN

Hair and Scalp Specialist Who Has Been at Hamburger's Past Eight Years Talks Most Interestingly About the Hair

He says baldness is increasing rapidly among men and points out some of the reasons. Prof. Austin

is probably right in saying that only one man in every hundred over thinks about his hair at all except to comb it two or three times a day.

A man will give the utmost attention to his hair when trouble arises.

When trouble arises he will have more trouble and probably lose his teeth if he doesn't go to a dentist promptly. But when trouble doesn't arise, it just gradually dies, and when it is nearly gone, and the roots are dead, he suddenly tries a dozen different remedies and then resigns himself to baldness.

Prof. Austin says the use of dandruff and scalp cures and the like tonics without proper advice is like taking medicine without knowing what you are trying to cure. Prof. Austin examined Alice's hair with a powerful microscope. He finds out just what is the trouble with your hair and then tells you what to do for the trouble.

FREE MICROSCOPIC EXAMINATION of the hair and scalp—both men and women invited.

## LOVE NOTES CHARGED TO MAIL MAN

Wife is Granted Divorce  
Despite Letters Brought to Court by Mate

The sentimental letters asserted to have been written by a rural mail carrier named Gookin to Mrs. Eva M. Dunlap were introduced in divorce proceedings in Judge Craig's court yesterday.

Mrs. Dunlap was granted a divorce from David A. Dunlap, whom she accused of chronic jealousy.

In the husband's answer was related the story of the meeting between Mrs. Dunlap and Gookin and the subsequent conversation. The complaint asserted that Mrs. Dunlap had to go shopping one day and rode with the mail carrier to their many points of similarity.

The "first come, first served" principle of procedure seems to have seized upon the imagination of some of the aspirants for Superior Court judgeships to be filled by appointment by Gov. Richardson. More than sixty Los Angeles county attorneys are active candidates. The Board of Supervisors will fill the places of the Justices and Police Courts.

"It does not seem real to meet anyone with such beautiful thoughts. Am I just dreaming, or are you say? Or, am I just an ordinary sort of person, but I would like to be everything you describe. I know you have described thoughts of my dream girl to me. Oh, if thoughts could talk, you would be happy now."

## WOMAN MAY BE SUPERIOR JUDGE

Gov. Richardson Considering Several Applicants

Six Appointments to be Made to High Court

Executive to Ignore Political Pull of Aspirants

BY THE WATCHMAN

California in its history has experienced many "rushes"—gold rushes, land rushes, oil rushes. The stampede now in progress for the five new places on the Superior bench, the three new justices of the peace and the two new Police Court judgeships, created for Los Angeles county by the last Legislature, presents many points of similarity.

The "first come, first served" principle of procedure seems to have seized upon the imagination of some of the aspirants for Superior Court judgeships to be filled by appointment by Gov. Richardson. More than sixty Los Angeles county attorneys are active candidates. The Board of Supervisors will fill the places of the Justices and Police Courts.

"It does not seem real to meet anyone with such beautiful thoughts. Am I just dreaming, or are you say? Or, am I just an ordinary sort of person, but I would like to be everything you describe. I know you have described thoughts of my dream girl to me. Oh, if thoughts could talk, you would be happy now."

## GIRL ATTACKED IN Y. W. C. A.

Early Morning Prowler Strikes Intended Victim With Weapon When She Screams

Entering the Y.W.C.A., 437 Ninth street, Los Angeles Harbor, at an early hour yesterday morning, an unidentified man attacked Miss Miria McMullen, night secretary, 21 years of age, before he was frightened away by cries of his intended victim.

As a result of the attack, Miss McMullen was in a severe condition at her home, 917 South Main street, late yesterday and physicians declared she was suffering from wounds inflicted by a black-jack.

According to a statement by Miss Jean MacGillivray, secretary of the Y.W.C.A., Miss McMullen was awakened about 8 a.m. by a prowler in her room. When the man struck the bed in which she was sleeping, she screamed so loud that then that he struck her with what is believed to have been a black-jack.

She continued to scream and the man attempted to choke her. The pace is fast and becoming faster.

**AGGRESSIVE ACTIVITY**  
The most aggressive activity, of course, centers around the Superior Court judgeships to be filled by appointment by Gov. Richardson.

More than sixty Los Angeles county attorneys are active candidates. The Board of Supervisors proceeded in like manner with the Police Judge bill, introduced by State Senator Chamberlain, and the Justice bill, introduced by Assemblyman Lyons.

It may be safely assumed, therefore, after proceeding at such length to determine whether or not the county needs five more judges on the Superior bench, Gov. Richardson will exercise considerable care in his choice. In his own words, "I am inclined to believe that the main qualification in the opinion of the public is that the man appointed to these places in the state of Judge Rive leaves a sixth place to be filled by gubernatorial appointment."

**FOUR OR FIVE CANDIDATES**

The Governor has clearing indicated that political considerations will not weigh with him in his decision. It is probable that one of the six individuals to be appointed by him to the Superior bench will be a woman. Four or five women attorneys are candidates for the appointment. There has been much discussion as to the possible choice of a woman to fill one of the two new places on the police bench.

The fact that an attorney has been chosen as a candidate for appointment to the Superior bench probably will not prove a handicap, provided the candidate or his friends do not permit enthusiasm to encourage too much enterprise, but it is important to remember that the man who is chosen for this appointment will not decide the issue and the Governor, following an independence of thought and action that have marked his official career, will not be swayed and place individuals on the bench who have not sought the honor.

Gov. Richardson will come to Los Angeles within a few days and he and his family, probably will remain in Southern California for several weeks. During his visit here it is probable that he will decide upon whom he will confer judicial responsibilities.

**IN PUBLIC SERVICE**  
In approaching his own responsibility with such general principles of public service, Gov. Richardson deserves the warmest commendation from the people of Los Angeles county and from the people of the State, for the integrity, ability, intelligence and legal experience of the members of the judiciary, either in the city, county or State courts, must be of the highest and beyond question.

Meanwhile, the amount of maneuvering and wire-pulling that is taking place with relation to these appointments is somewhat astounding. It is inevitable that much of this intense activity sooner or later must result probably be classed as wasted effort.

**Broadway Block Bought by Base Ball Nine Owner**

Dr. Charles H. Strub, San Francisco capitalist and owner of the San Francisco baseball club, completed negotiations yesterday for the purchase of a ninety-nine-year lease on a four-story building at 751 South Broadway. The total investment involved will be in excess of \$8,000,000. A cash consideration of \$250,000 was paid for the transfer of the lease.

The property has been controlled by the Shultz Mutual Drug Company, which recently rebuilt the ground floor, basement and mezzanine floors for a bank in its chain of drug stores. John M. Donahue of the James J. Donahue Realty Company represented both buyer and seller in the transaction.

Plans for the remodeling of the structure, the cost of which of several stories will be announced tomorrow on the arrival of Dr. Strub from San Francisco.

**Seek Probation for Auto Driver Who Killed Boy**

Hearing on a probation application for Vincente Fornas, a Spaniard, arrived recently from Spain, was continued yesterday by Judge Reeve until July 8.

Fornas was convicted of manslaughter in the killing of John L. Syman, 8 years of age, in an automobile accident December 27, 1921.

In a report filed by Probation Officer Nelly, it was indicated that Fornas was not opposed to probation. Fornas, a chauffeur, for Captain Franklin M. Hauser, 1128 Leighton avenue.

**Divorce Granted Artist From Her Singer Husband**

Gloria Mae Coley was granted a divorce from William H. Coley, a singer, by Judge Price of the Superior Court yesterday after a bitter fight contest.

Coley also was given permission to resume her maiden name of Klinker, given half the real property, furniture in their home and a sum in local savings account held by her husband.

She charged, during the trial, that her husband put air and mannequins to convince acquaintances of his genius and also assumed the support of his wife. Coley, who is an artist, was represented by Attorney James W. Bell.

**MOOSE FETE BACKED BY SECRETARY DAVIS**

United States Secretary of Labor James J. Davis, director-general of the Loyalty Order of Moose, has given official sanction to the carnival which Moose of Southern California, under auspices of the Venice Lodge, will stage at Cameron's Ranch, Culver City, from the 29th instant to July 4, inclusive. In a letter to Fred Frank, president of the carnival committee, Secretary Davis said:

"I am mighty interested in the success of your celebration at Culver City. I hope this will result in adding materially to the coffers of our organization and the work at Mooseheart. I wish it were such that I could participate in this celebration. That being impossible, I am going to be with you in spirit."

**JEAN ACKER SETTLES JUDGMENT; CASE ENDS**

Jean Acker, first wife of Randolph Valentine, was scheduled to appear in Superior Court yesterday to show cause why she should not pay judgment of \$49 obtained by Fred Smith, representative of a mercantile house in New York, but when the case was called attorneys announced that the judgment had been paid.

## 'HARD GUY' LIBERATED IN MURDER

District Attorney Moves Dismissal on Grounds of New Evidence

John M. Slaten, self-styled "hard guy from Texas" whose trial several months ago on a charge of killing Estefano Mendez, September 29, 1922, resulted in a disagreement, yesterday was discharged by Judge McCormick of Superior Court when the District Attorney moved for dismissal of the charge.

New evidence showing that Slaten was not the man who killed Harbor Police and taken before Miss McMullen for identification but owing to her inability to identify either, they were released.

Slaten achieved the appellation "hard guy" from the time it was asserted at the trial for a remark asserted to have been made by him a short time before Mendez was found suffering from pistol wounds.

Slaten achieved the appellation "hard guy" from the time it was asserted at the trial for a remark asserted to have been made by him a short time before Mendez was found suffering from pistol wounds.

## Mrs. Richards Hardly Able to Express Joy

Will Praise Tanlac to Dying Day for Completely Restoring Health and Strength, Declares San Francisco Woman; Gains Weight.

"Words just can't express how cheerful and happy I really am over my new health and how thankful I feel towards Tanlac," is the truthful statement of Mrs. H. H. Richards, highly esteemed resident of 125 Montana St., San Francisco.

"About two years ago I had a spell of sickness that left me dreadfully weak and run down. I had absolutely no appetite and was losing weight all the time. My nerves were so unstrung I trembled like a leaf, couldn't sleep or rest

at night, and everything seemed to upset me. I was so exhausted it was all I could do to drag around the house, and was badly worried over my condition, for I was getting weaker every day."

"Well, it's simply surprising the way Tanlac helped me. My appetite soon came back when I started on the treatment. I began to recover my strength and put on weight, and that week, run down feeling all left me. My nerves became steady, I slept good, and by the time I finished my fifth bottle I felt like myself again. I will always praise Tanlac."

Tanlac is for sale by all good druggists. Accept no substitute. Over 27 million bottles sold.

Tanlac Vegetable Pills are nature's own remedy for constipation. For Sale everywhere.—[Advertisement]

## FIRM WINS OIL SUIT IN VALLEY

Case in Tulare County Arouses Interest

Damages Asked to Pay for the Leases

Giant Reptile Captured on Dinuba Streets

[EXCLUSIVE DISPATCH]

VISALIA, June 25.—A jury trying the civil case of R. H. Shanahan vs. G. M. Calmus and Elsie P. Bettis, both of Los Angeles, in which the plaintiff asked \$472,194 for securing oil leases in the Ducor section, returned a verdict for the plaintiff for the full amount, less 10 per cent. This was the first suit arising out of oil operations in Tulare county, and was watched with much interest.

The plaintiff asserted that he worked diligently for some time in securing leases and options for leases on about 2,000 acres of land in the Ducor, as well as working on the rig of the defendant. The defendants answered that they had paid everything due.

CAPTURED SNAKE

DUCOR, June 24.—"Seeing snakes" early in the morning is usually considered a bad sign, but Clarence Morrison, manager of the Dinuba Plant, Miller & Ulrich, daunted by one he saw and now has the honor of having captured the largest reptile ever seen in the city.

Morrison encountered the huge snake as he started from his office for a trip uptown. It lay coiled on the sidewalk, enjoying a siesta. He summoned aid and captured it. It was 10 feet long and measured six feet and four inches in length and two inches in diameter.

THE CAPTIVE was placed on exhibition downtown, shown wide and will be taken to Morrison's ranch and allowed to feast at will on the gophers there. It is believed the reptile was brought to the city in a load of hay from some near ranch.

SUIT AGAINST THEATER

Suit against the new Strand Theater in Dinuba—"Seizing the public's right to air," by the Valley Electrical Supply Company, which asks \$555,000 for material and labor in connection with construction of the building, considered one of the best theaters in the state, was filed yesterday against J. W. Williams, owner, and William Asher, manager and lessee.

Threat of the suit had been removed for a month in connection with a group that the theater was not making money, but late reports in Dinuba indicated that the management had been successful in putting over contact by which it is hoped to make enterprise a paying proposition.

GETS LEOPARD SKIN

POTTERVILLE, June 24.—Suggestion of the tropical jungles is found in a handsome leopard skin recently received by Mrs. Lena Roth from her son, Dr. Douglas, who was born in South America for the last two years as geologist for an oil company. The skin was sent from Colombia, South America. Henry is expected to arrive in San Francisco next week and return to reside here for a visit. Mrs. Roth also has a leopard skin which she received from her daughter, Mrs. Douglas McMillian, who resides in the Congo region of Africa.

COMPANY ELECTS

PLANO, June 24.—New directors were elected at the annual meeting of stockholders of the Plano Packing Company as follows: Peter Ting, C. E. Lewis, William Ross, Edward Allen, B. L. Starkey, Mr. Burroughs and O. Shipton, officers; W. P. President; Peter Ting, vice-president; Mr. Burroughs, secretary manager; W. S. Shippey, treasurer; F. W. V. C. E. Lewis will represent the company in the coming organization. Decision was made to install an electric sweating apparatus in the packing-house during the coming season, replacing the one being operated by kerosene.

SERVICE TO VERDUGO

Salt Lake Railroad Gets Permit To Electrify Tracks

Residents in Verdugo Hills near Glendale soon will be able to travel to Los Angeles over the Salt Lake Railroad tracks, approval of Board of Public Utilities having been given yesterday to the request by the railroad company to electrify the section of tracks. Electric trains will be run through the section not now served by street cars to Verdugo road where transfer to the Los Angeles street cars will be possible, it was stated. The fare to Los Angeles from Verdugo Hills on the new line will be 15 cents, it was said.

HONORED BY Y.W.C.A.

Association Celebrates Birthday of Charter Member

The Young Women's Christian Association and Mrs. John M. Ferguson are joining in a birthday-anniversary celebration for Mrs. Ferguson's mother, Mrs. L. A. Ross, of South Orange avenue, Thursday afternoon at the Y.W.C.A. Mrs. Ross is a charter member of the Y.W.C.A., one of two charter members who have served continuously since the association was founded. She spent twenty-five years of active service, for many years as recording secretary and for twelve years as chairman of the travelers' aid department.

VETERAN DIVORCED

Wife of Harry O. Collins Falls to Appear in Court

Harry O. Collins, wounded war veteran, yesterday was granted a divorce from Mrs. Lila A. Collins by Judge Hardin. The cause has been continued to permit the wife to testify, but she did not appear. On Saturday, when the case first came up, Mrs. May Devine, who had the trial, tried to get Mrs. Collins, testified that Collins neglected his wife for other women and that his wife could not appear in court because she was caring for a sick child.

## LEAPS CLIFF TO EVADE RATTLER

Boy Scout Escapes Death by Quick Action

Thresher Strips Clothing From Farm Hand

Porterville Citrus Growers Elect Officers

[EXCLUSIVE DISPATCH]

VISALIA, June 25.—A jury trying the civil case of R. H. Shanahan vs. G. M. Calmus and Elsie P. Bettis, both of Los Angeles, in which the plaintiff asked \$472,194 for securing oil leases in the Ducor section, returned a verdict for the plaintiff for the full amount, less 10 per cent. This was the first suit arising out of oil operations in Tulare county, and was watched with much interest.

The plaintiff asserted that he worked diligently for some time in securing leases and options for leases on about 2,000 acres of land in the Ducor, as well as working on the rig of the defendant. The defendants answered that they had paid everything due.

INJURED IN THRESHER

DUCOR, June 25.—Henry J. Kambich, farm hand on the Barstow Ranch near here, is in the Mt. Whitney Hospital suffering from a broken rib, several bruises and a torn ear, as a result of being caught in a threshing machine which tore all of the clothing from his body except his hat and shoes. Kambich was working with the thresher when his fellow-workmen heard a shout and rushing out, shot off the power and discovered Henry on the ground devoid of clothing. In a strange freak his socks were removed and the shoes and hat left.

COMPLETE NEW BRIDGE

VISALIA, June 25.—"Mink Hollow" bridge across the Marbles Fork of the Kaweah River on the new Halwanche highway to Sequoia National Park, will be completed in a few days, according to Lawrence A. Moye, County Surveyor.

The new bridge is considered the finest structure ever built by Tulare county and will be an exhibit in county highway and bridge construction.

LONGER FOREST IN FOREST

GIANT FOREST, June 25.—Col. White, superintendent of the Giant Forest School National park, announced a new school in the Giant Forest road control under which cars will be able to leave the forest at 7:30 p.m. on Sunday evening. The regular controls which is still in effect on weekdays and also applies on Sunday with the additional departure hour, has been from 2 to 3 p.m.

Complaint has been made to park officials that parties wishing to spend one day in the Giant Forest would not be able to come down by 9 p.m., as it gave them only a few hours in the forest.

NEW POLICE JUDGE

TULARE, June 25.—W. R. Snow has been sworn in as police judge for the city of Tulare to fill the vacancy caused by the death of A. W. Gettman. A petition was read at the Council meeting from residents of the Auburndale tract, asking that Apricot avenue, the principal street of the tract, be paved with the gutters and sidewalks put in. The matter will be taken under advisement by City Manager George Lewis, who will report his findings to the new police. Permission to run a pool hall was asked by J. V. Machado.

EDITOR RESIGNS

TULARE, June 25.—David L. Mackay, who has been acting as editor and manager of the Tulare Advance, will retire from the position on June 28th and leave for Berkeley, where he will attend summer school. Mackay has had several years' experience as instructor of citizenship among the foreign students of Tulare and plans to prepare himself for higher education in that branch of the local schools.

CITRUS GROWER OFFICERS

POTTERVILLE, June 25.—At the annual meeting of stockholders of the Porterville Citrus Association and Porterville Packing House Company, joint managing directors and officers for the coming year were elected as follows:

Directors and officers for the Citrus Association are: W. P. Bartlett, president; G. Frank Ross, vice-president; John Carter, Robert Baird, John H. Orr, W. L. Shadwell, B. S. Shadwell, and W. L. Baird, all of Porterville. Directors not on the board are: F. W. Villegas, treasurer, and John A. Milligan, secretary and manager.

W. P. Bartlett is president of the packing house company. Frank Rossire, vice-president; Robert Baird, P. J. Robinson, W. E. Sprott and John Orr make up the board of directors. John A. Milligan is secretary and manager.

CONVICTED SLAYER IN LAST-HOUR APPEAL

FRESNO, June 25.—Although Gov. Richardson indicated that he will show no leniency to Mauro Parisi, sentenced to hang next Friday for the murder of Felix Paladino here a year ago, a last-hour appeal to the Governor to commute the sentence to life imprisonment. When tried, Parisi maintained he had acted in self-defense. He now says his sister was insulted by the slain man. On the basis of this new story the appeal for clemency will be made.

The man was apparently a stranger in the city and registered at the rooming house owned by the man of A. Anderson. She died in the Bramble Funeral Home, 1249 South Flower street.

AGED BOOTHBLACK DIES

HANFORD, June 25.—Samuel Boothblack, who for more than thirty-one years has polished shoes at his own stands on different business streets of this city, was buried here today. People who know him well say he never minded a customer who came along at his stand. He was on duty up to two days before he passed away. His age was unknown, but he was probably 80 years of age and the old-timer in service of the public in California. He came to Hanford from Washington, D. C., and is a relative in this State, as far as is known.

Leading commodities purchased by Japan from this country are raw cotton, pig iron, bar iron, machinery and automobiles.

## DESERTED TOWN OF KERN COUNTY

Pioneer Recalls History of Original Settlement

Keysville Was Real Center of Gold Rush Days

Remembrance Thrilling Tale of Early Times

[EXCLUSIVE DISPATCH]

HAKESFIELD, June 25.—Like Havilah, Kern county's first capital, there is another "deserted village" in the mountains of northeast Kern, where the first permanent settlements were being made when all the floor of the valley, now dotted with cities and checkered with prosperous farms was still a cottonwood-shaded waste. Keyville is the name of the now almost forgotten town which antedated Havilah, and appears to have been the first authentic settlement in the county, though its population never at any time exceeded 300.

A. Lightner, and his sisters, Mrs. Mary and Mrs. Walke, are probably the only residents of the early town now living in Bakerfield. When the rich cream of gold had been taken from the gulches tributary to Kern River, those who remained nothing to hold the settlers to the village, and they scattered. Gustav Heuschkel, miner and prospector, still lives near the old cemetery where both Mr. Lightner's parents are buried and washed enough gold to suffice his needs. For many years, he has been probably the only inhabitant of the deserted village.

PICTURESQUE STORY

The story of Keyville's founding is a story of the picturesque early days when men discovered that there was gold in California even away from the mother lode, and great numbers of prospectors started like ants through the mountain backbone of the State, searching for the precious metal. About the headwaters, and down the course of the Kern, where it flows through a channel of solid rock, the miners took up their claims and followed the trail of their dreams.

This was about 1851. "Gulch mining" proved easy and profitable, for from some hidden El Dorado veins ran down French Gulch and Rich Gulch, and countless other gulches to the river.

RICHARD Keys and John Keys, two brothers, came in the '60's, and in 1851, Richard Keys discovered the mine which afterwards bore his name, and did the most work in the mining camp.

A few years later, in the spring of 1857, A. T. Lightner, brought his family by wagon-train down the mountains from Santa Clara county, and was at that time 7 years of age, and from his vivid memory of those childhood days, most of the picture of the old mining days is reconstructed. The trail the Lightners followed was the same one the boy had sought most of Kern county's early settlers, and is so rich in historical memories that one riding over the same route today can scarcely help being stirred by a sensation of latent intimacy with those who have come comfortable and familiar descendants from the wilderness. By way of Guyer and over Pacheco Pass; past Firebaugh's Ferry and down to Visalia and Porterville; then to White River, and up to Livermore Valley, where Glenville is today, the pioneers steered a straight course for the promised land, their blood quickened by dreams of freedom and gold—much gold.

Drug Violator Prefers Prison to County Jail

[EXCLUSIVE DISPATCH]

When Charles H. Fisher and John Strasburg pleaded guilty to a violation of the Harrison narcotic law, before Judge Trippet yesterday, Fisher was given six months in the County Jail and Strasburg thirteen months in the Federal penitentiary at Fort Leavenworth.

Fisher asked that he be sent to the prison at Fort Leavenworth, his health being such that he feared he might die if he remained in the County Jail any length of time. As under the law he could not be sentenced for a period less than one year, the court acceded to his wishes and gave him a day and a day in the Kansas prison.

Fisher asked that he be sent to the prison at Fort Leavenworth, his health being such that he feared he might die if he remained in the County Jail any length of time. As under the law he could not be sentenced for a period less than one year, the court acceded to his wishes and gave him a day and a day in the Kansas prison.

ESCAPING GAS KILLS TATTOOED STRANGER

UNIDENTIFIED MAN FOUND DEAD IN ROOM OF LODGING-HOUSE

An unidentified man about 28 years old was found dead yesterday afternoon in a gas-filled street at 23 West Fifteenth street. The body is described as that of a man five feet tall, middle-aged, with blue eyes, worn a dark suit and a cap purchased in San Francisco. A lady's head, a flag and other decorations are tattooed on the right forearm.

The man was apparently a stranger in the city and registered at the rooming house owned by the man of A. Anderson. She died in the Bramble Funeral Home, 1249 South Flower street.
